

Thesis writing

- Introduction to Research & Thesis Writing 2
(Arts, Business Administration, Education, Law & Social Science)
- Introduction to Research & Thesis Writing 3
(Engineering, Medicine & Science)
- Thesis Writing Workshop 4
(Arts, Business Administration, Education, Law & Social Science)
- Thesis Writing Workshop 5
(Engineering, Medicine & Science)

Introduction to Research & Thesis Writing

For Arts, Business Administration, Education, Law & Social Science

Speaker

Dr Yvonne Loong

Acting Director and Senior Lecturer, Independent Learning Centre

Designed for

First year postgraduate research students in Arts, Business Administration, Education, Law and Social Science.

Objective

During the workshop, participants will be introduced to areas and concerns important to thesis writing: overall thesis structure; discourse & language features of thesis sections; organization & signposting; and proper citation practices & styles.

Structure

3-hour lecture including a Q&A session

Medium of Instruction

English

Brief Description

Important procedures in writing theses and scholarly essays; specific format and rules commonly adopted for bibliographic references and citation notes.

Follow-up Workshop

Participants are greatly encouraged to attend the Thesis Writing Workshop for more intensive training during their second year of study or when they have a research proposal already prepared.

Introduction to Research & Thesis Writing

For Engineering, Medicine & Science

Speaker

Professor Zhang Ying-Jun, Angela

Associate Professor, Department of Information Engineering

Designed for

First year postgraduate research students in Engineering, Medicine and Science.

Objective

- to identify key issues involved in selecting a research topic and in thesis writing in reference to resources available.

Structure

2.5-hour lecture including a Q&A session

Medium of Instruction

English

Brief Description

Choosing a topic, literature review, writing for the audience, styles, references, scientific writing.

Follow-up Workshop

Participants are greatly encouraged to attend the Thesis Writing Workshop for more intensive training during their second year of study or when they have a research proposal already prepared.

Thesis Writing Workshop
For Engineering, Medicine & Science

Speaker
Dr Jose Lai
Director, English Language Teaching Unit

Designed for

Postgraduate students in Engineering, Medicine & Science who are in the process of writing their theses. This workshop is particularly suitable for students who have already prepared a research proposal, and are in the second or later years of their graduate degree programs.

Objectives & Description

For Engineering students:

- to introduce the basic structure of a thesis
- to identify the basic structure and function of a general introduction
- to identify the language features of the results and general discussion sections
- to analyse the form and function of the thesis title and summary or abstract
- to introduce some key writing strategies for clear and concise writing

For Medicine and Science students:

- to introduce the basic structure of a thesis.
- to identify the basic structure and function of a general introduction
- to identify the language features of the results and general discussion sections
- to analyse the form and function of the summary or abstract
- to introduce some key writing strategies for clear and concise writing

Structure 3-hour workshop

Medium of Instruction English
