 Use Policies and Guidelines of CUguest Wi-Fi Service

The University Information Technology Services Centre (ITSC) has implemented a Wi-Fi service (SSID=CUguest) for SCS full-time students, University alumni and guests who have registered for the service.

Note:

1. To access the CUguest Wi-Fi Service, you should have read and agreed to the policies and guidelines published at [http://www.cuhk.edu.hk/itsc/about/wlan\\_policy.html](http://www.cuhk.edu.hk/itsc/about/wlan_policy.html).
2. Except for the initial password checking, all the data are transferred in plain text without encryption. You should therefore avoid accessing sites that ask for your sensitive / personal information without proper encryption.
3. Smartphone users should temporarily disable mobile data services such as GPRS, EDGE, UMTS or HSDPA provided by your mobile operator. This helps to avoid the associated service charge from your mobile operator caused by the accidental change of Internet access from the campus free Wi-Fi connections to mobile data services when the Wi-Fi signal becomes weak or inaccessible. For details of how to disable your mobile data services, please contact your mobile operator.
4. According to the University policy, Win XP computer is not allowed to connect to the campus network including, but not limited to, departmental networks, Central WiFi (e.g. SSID=CUguest), ResNet, ClassNet and VPN. Please upgrade your computer to Win 7 or above if you want to connect to the campus network.
5. For more details, please visit <http://www.cuhk.edu.hk/itsc/network/wlan>.
