

Physics

Applicable to students admitted in 2015-16

Students admitted to the Physics Major Programme through the Broad-based admission scheme may apply to specialize in the *Enrichment Stream in Theoretical Physics* no sooner than their third year of attendance if they have obtained a GPA of 3.3 or above in all PHYS courses (excluding PHYS courses at 1000 level). Students admitted to the Theoretical Physics Programme are placed in the *Enrichment Stream in Theoretical Physics* automatically, declaration is not required. The minimum units required for the *Enrichment Stream in Theoretical Physics* is 72.

Explanatory Notes:

1. PHYS and MSEG courses at 2000 and above level will be included in the calculation of Major GPA for honours classification.
- [a] Upon written approval of the Department, students who have failed a required course in the final year of attendance may be allowed to take a substitute course at the same level as prescribed by the Department.
- [b] Students can be exempted from taking the PHYS course by taking its closely related course, as listed below to fulfill the requirement. Units earned can be counted towards the Major Programme.

PHYS courses		Closely related courses	
PHYS2051	Quantitative Methods for Basic Physics	MATH2020	Advanced Calculus II
PHYS2061	Basic Computational Physics	MATH3230	Numerical Analysis

- [c] Students who have taken both PHYS3031 and 4031 can use one of the courses to fulfill the Elective Courses requirement.
- [d] Upon approval of the Department, students who declare second major in Earth System Science may be allowed to use ESSC4810 and/or ESSC4820 to fulfill the requirement of PHYS4610 and/or PHYS4620.
- [e] Students, who are not under the Enrichment Stream in Theoretical Physics, have not taken PHYS4801 may seek approval from the Department to substitute PHYS4801 with PHYS4802. Students may also take both courses. In this case, PHYS4802 will be used to fulfill the Elective Courses requirement.
- [f] The units 6, and 21 (for Physics Stream) or 12 (for Enrichment Stream in Theoretical Physics) apply to students not taking CHEM1070/1072 to fulfill the Faculty Package requirement of the Physics Programme. Students should note that CHEM1070/1072 is a required course.
- [g] Students may seek approval from the Department to substitute PHYS2061 with CSCI2800/1510/1520/1110/1120 and to substitute PHYS3410 with ELEG2202.
- [h] PHYS and MSEG courses at 5000 level are offered by the Division of Physics and Division of Materials Science and Engineering respectively for postgraduate programmes.

- [i] Students may seek approval from the Department to substitute PHYS4021 with PHYS5410, PHYS4041 with PHYS5420, and PHYS4050 with PHYS5430.

In view of the fact that students admitted through the Broad-based admission scheme have more diverse academic backgrounds under the new senior secondary education system, two course patterns are recommended for students with different HKDSE preparations. Course pattern A is suitable for students who have a better physics and mathematics preparation, e.g. those taken Physics as a single elective subject or done well in Combined Science with a physics component and an elective module in mathematics in HKDSE, whereas course pattern B is for students who prefer to take preparatory courses in physics and/or mathematics in the first semester of studies so as to be better prepared before taking the physics major courses.
