

Three videos with Chinese subtitles have been completed, which were created to introduce the details of the SSPE Internship Programme SPED 4201 (Programme) to over 120 students, 30 collaborators and more than 60 supervisors involved in the Programme. Using the videos, the students, collaborators and supervisors were able take more responsibility for and exert more control over their own schedules to further understand the Programme settings and take action at different stages.

Overall, we did not encounter any major obstacles with this project. However, creating appropriate Chinese subtitles required extra caution to ensure that they were optimized for comprehensive and in-depth teaching purposes.

The download links for the videos are shown below:

1. Video 1 (collaborator version):
