ABOUT THE PROGRAMME

Under the Faculty of Education, the Department of Educational Psychology offers Master of Philosophy (M.Phil.) and Doctor of Philosophy (Ph.D.) research postgraduate programmes. Our colleagues are all leading scholar-researchers in their respective fields, with a focus on “big data” analyses in assessment and evaluation, child and adolescent development, counselling processes, educational neuroscience, basic and applied research in learning sciences, parenting, psycholinguistics and special educational needs. We aspire to conduct trailblazing research that will contribute to the advancement of theoretical knowledge and deepened understanding of educational processes. In embracing “Research Excellence for Good” as our vision, we are prepared to provide quality academic training to students in a bid to make substantive contributions to the local, national, and international scientific communities, and ultimately the betterment of the society.
