

22 - General Surgery Micro-Module: Operations made easy

Tools / Services	Pedagogical Uses
ITSC	<p>These micro-modules were used to allow the students to have some basic knowledge about common emergency surgical procedures, so that when they come across these cases during their clinical attachment, they can appreciate the case more and have deeper learning experience. The micro-modules produced in this project can be used to support flipped classroom activity and allow more detailed discussion about the topics.</p>
