MILESTONES IN E-LEARNING

1971

The Open University opens in England with an open admissions policy, and begins broadcasting lectures on television. **25,000 students enroll.**

1989

University of Phoenix launches its private, for-profit online school. **12 students enroll.**

1993

Criteria is created by pioneer William Graziadei III, Ph.D: e-learning systems must be easy to use, portable, replicable, scalable, and affordable.

1999

The term 'e-Learning' is coined at an educational seminar.

2004

Salman Khan records instructional YouTube videos to help his cousins with math. The rising popularity of these videos leads him to found the Khan Academy, a not-for-profit, free, online educational organization.

TOP 10 eLearning STATISTICS FOR 2014

The rise in eLearning's popularity isn't showing any signs of slowing. In fact, judging by the following Top 10 eLearning statistics for 2014, the future of the eLearning Industry is brighter than ever:

e-Learning industry
Money spent on self-paced
eLearning across the globe

\$35.6 billion

2011

BIG MONEY

\$56.2
billion

2013

2015

it's going
to **double**
by 2015.

2013: About **4.6** out of 10 college students
are taking at least one course online.

BIG USERS

roughly **half** of all college
classes* will be eLearning-based.

eLearning has the power to **increase information retention** rates by up to **60%** ⁽³⁾.

BIG IMPROVEMENT

it's also **more**
(the learning process).

Big Education in the Era of Big Data @ IWAIT 2015, January 12, 2015. Tainan, Taiwan

The task of the modern educator is not to cut down jungles, but to irrigate deserts.

Personalized Learning

Basic Genetics Refresher (OPTIONAL)

Active Learning

The screenshot shows a courseware interface with a navigation menu on the left and a video player in the center. The navigation menu includes links for Courseware, Course Info, Discussion, Wiki, Progress, and Syllabus & Course Information. The video player is titled "FOR LOOP COMBINATIONS" and displays a "Nested loop trace example" with the following code:

```
for i = 1:3
    fprintf('*')
    for j = 1:5
        fprintf('%d', j)
    end
    fprintf('\n')
end
```

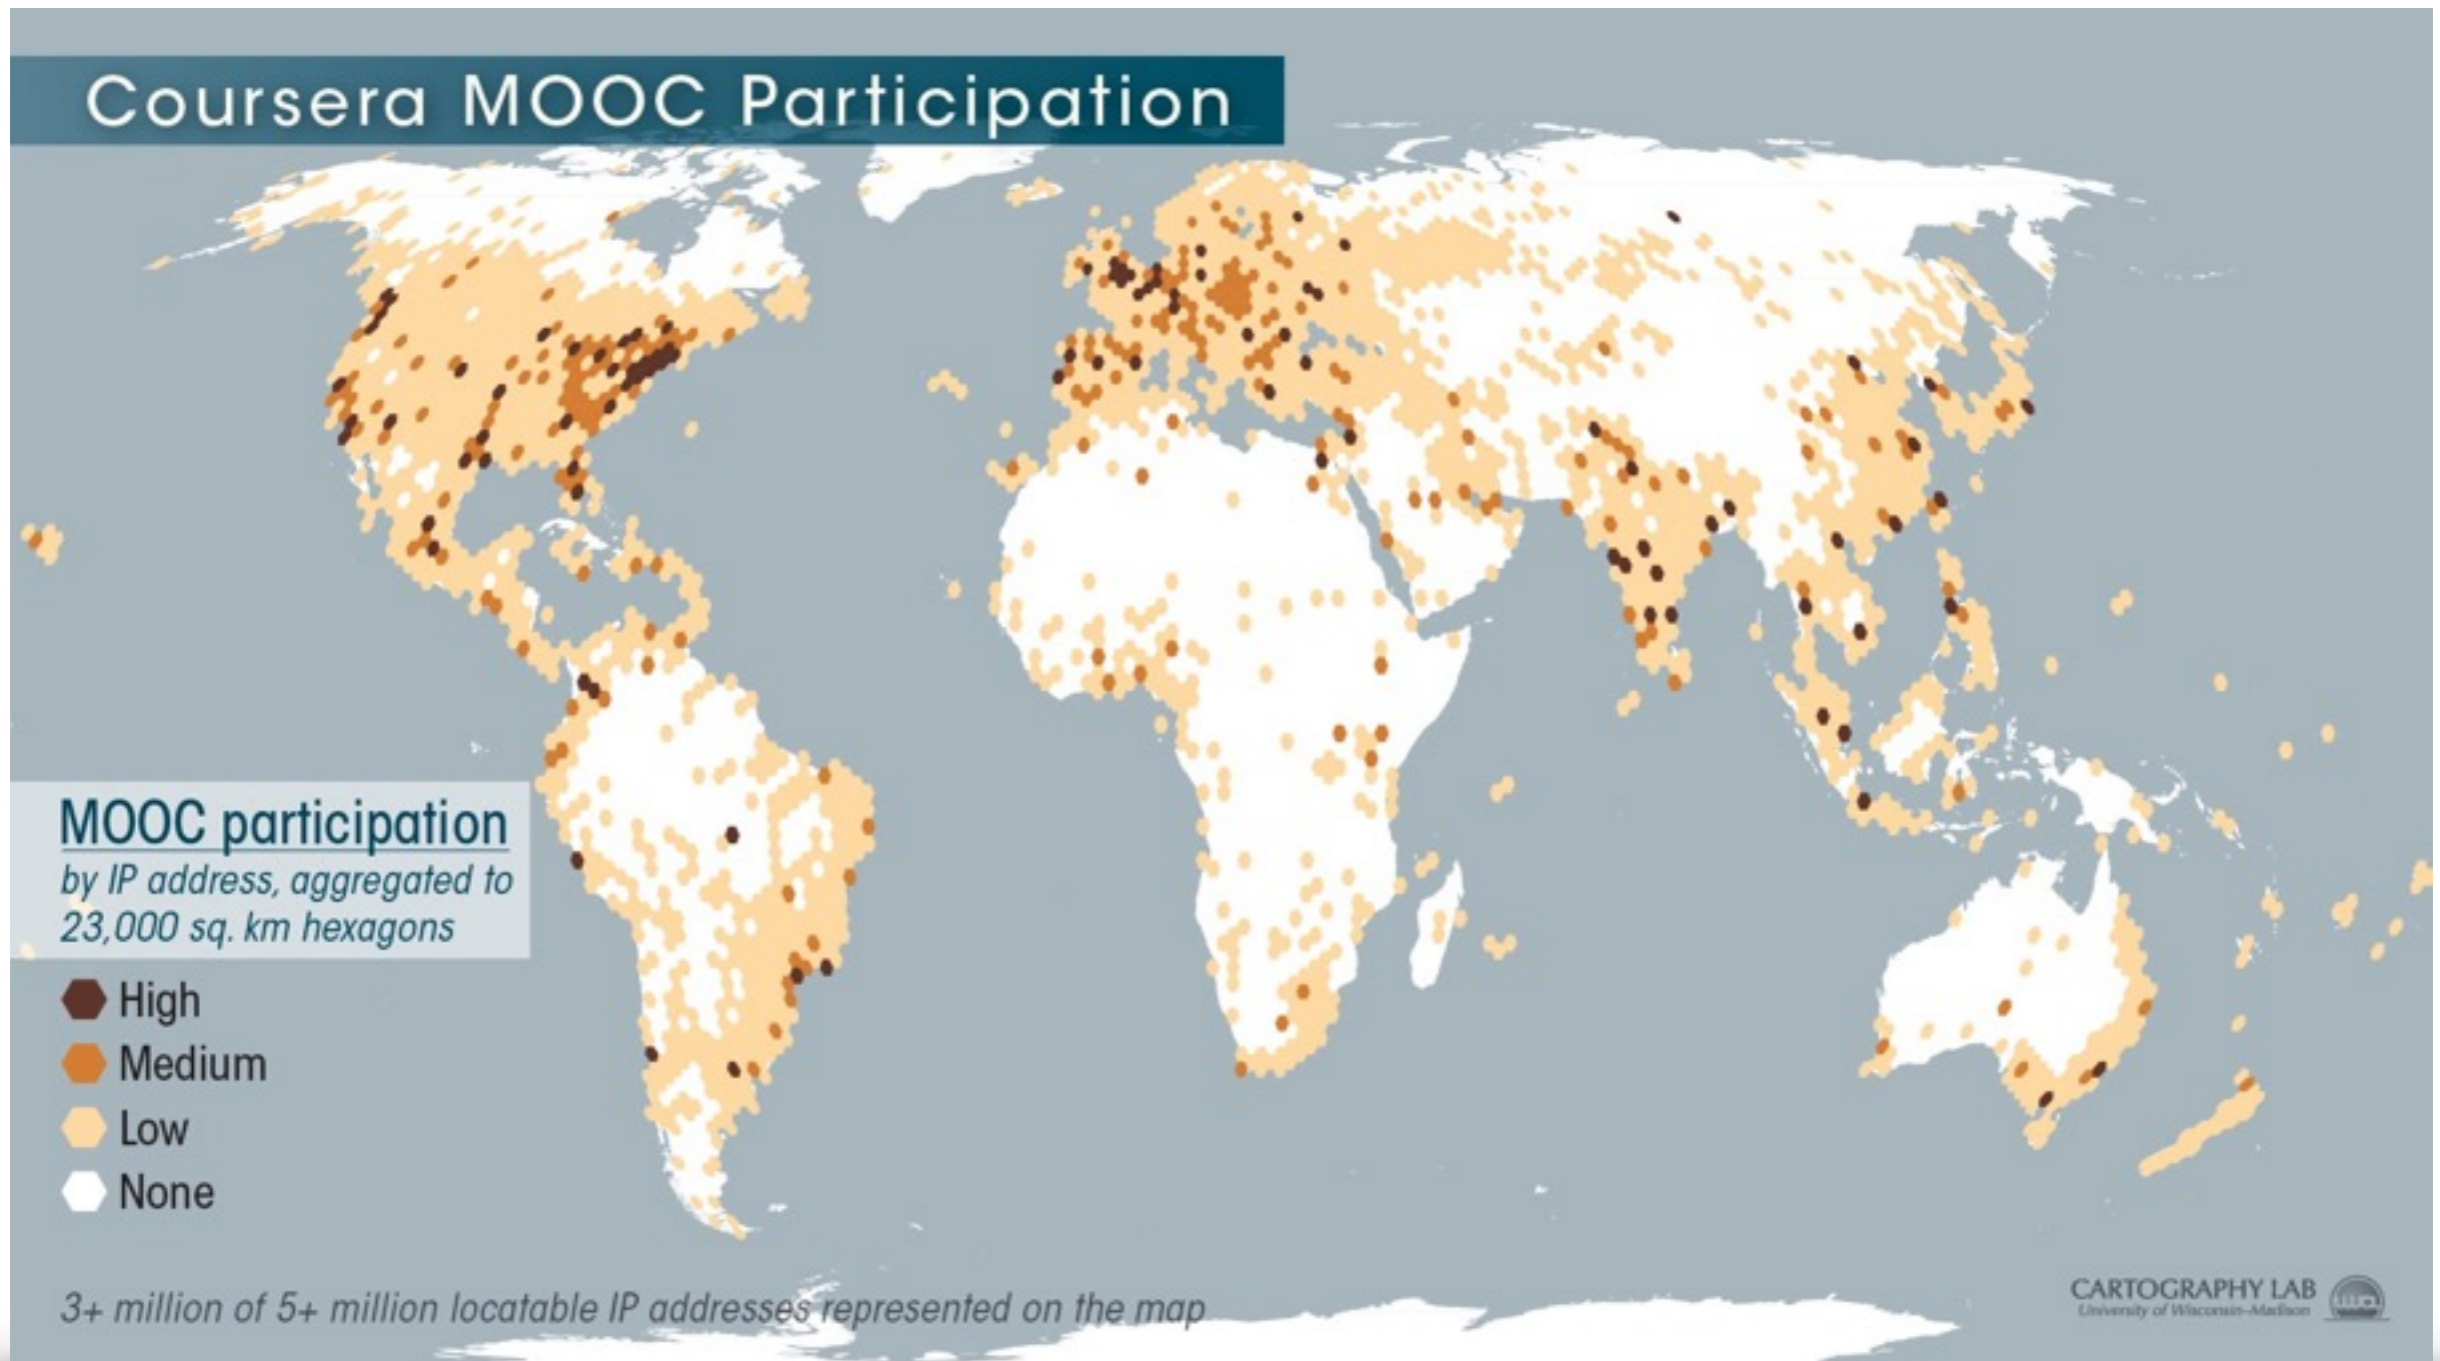

The output of the code is shown as:

```
Output:
*12345
*12345
*12345
```

The video player interface includes a play button, a progress bar showing 0:00 / 5:14, and a speed control set to 1.0x.

Knowledge and Education Exchange Platform

What is KEEP?

- KEEP is a **multi-year** and **cross-institutional** project with strong partners and alliances
- KEEP is the **big data learning analytics** cloud platform
- KEEP serves as a creative **online learning gateway** for educators and learners around the world
- KEEP encourages and promotes **flexible and active learning**
- KEEP is a **knowledge aggregator** and a **technology integrator**

Our **Vision**

To **empower people** by providing and promoting the **best education resources** in order to facilitate collaboration and innovation for **teaching and learning** through **knowledge aggregation** and **technology integration**

Our **Mission**

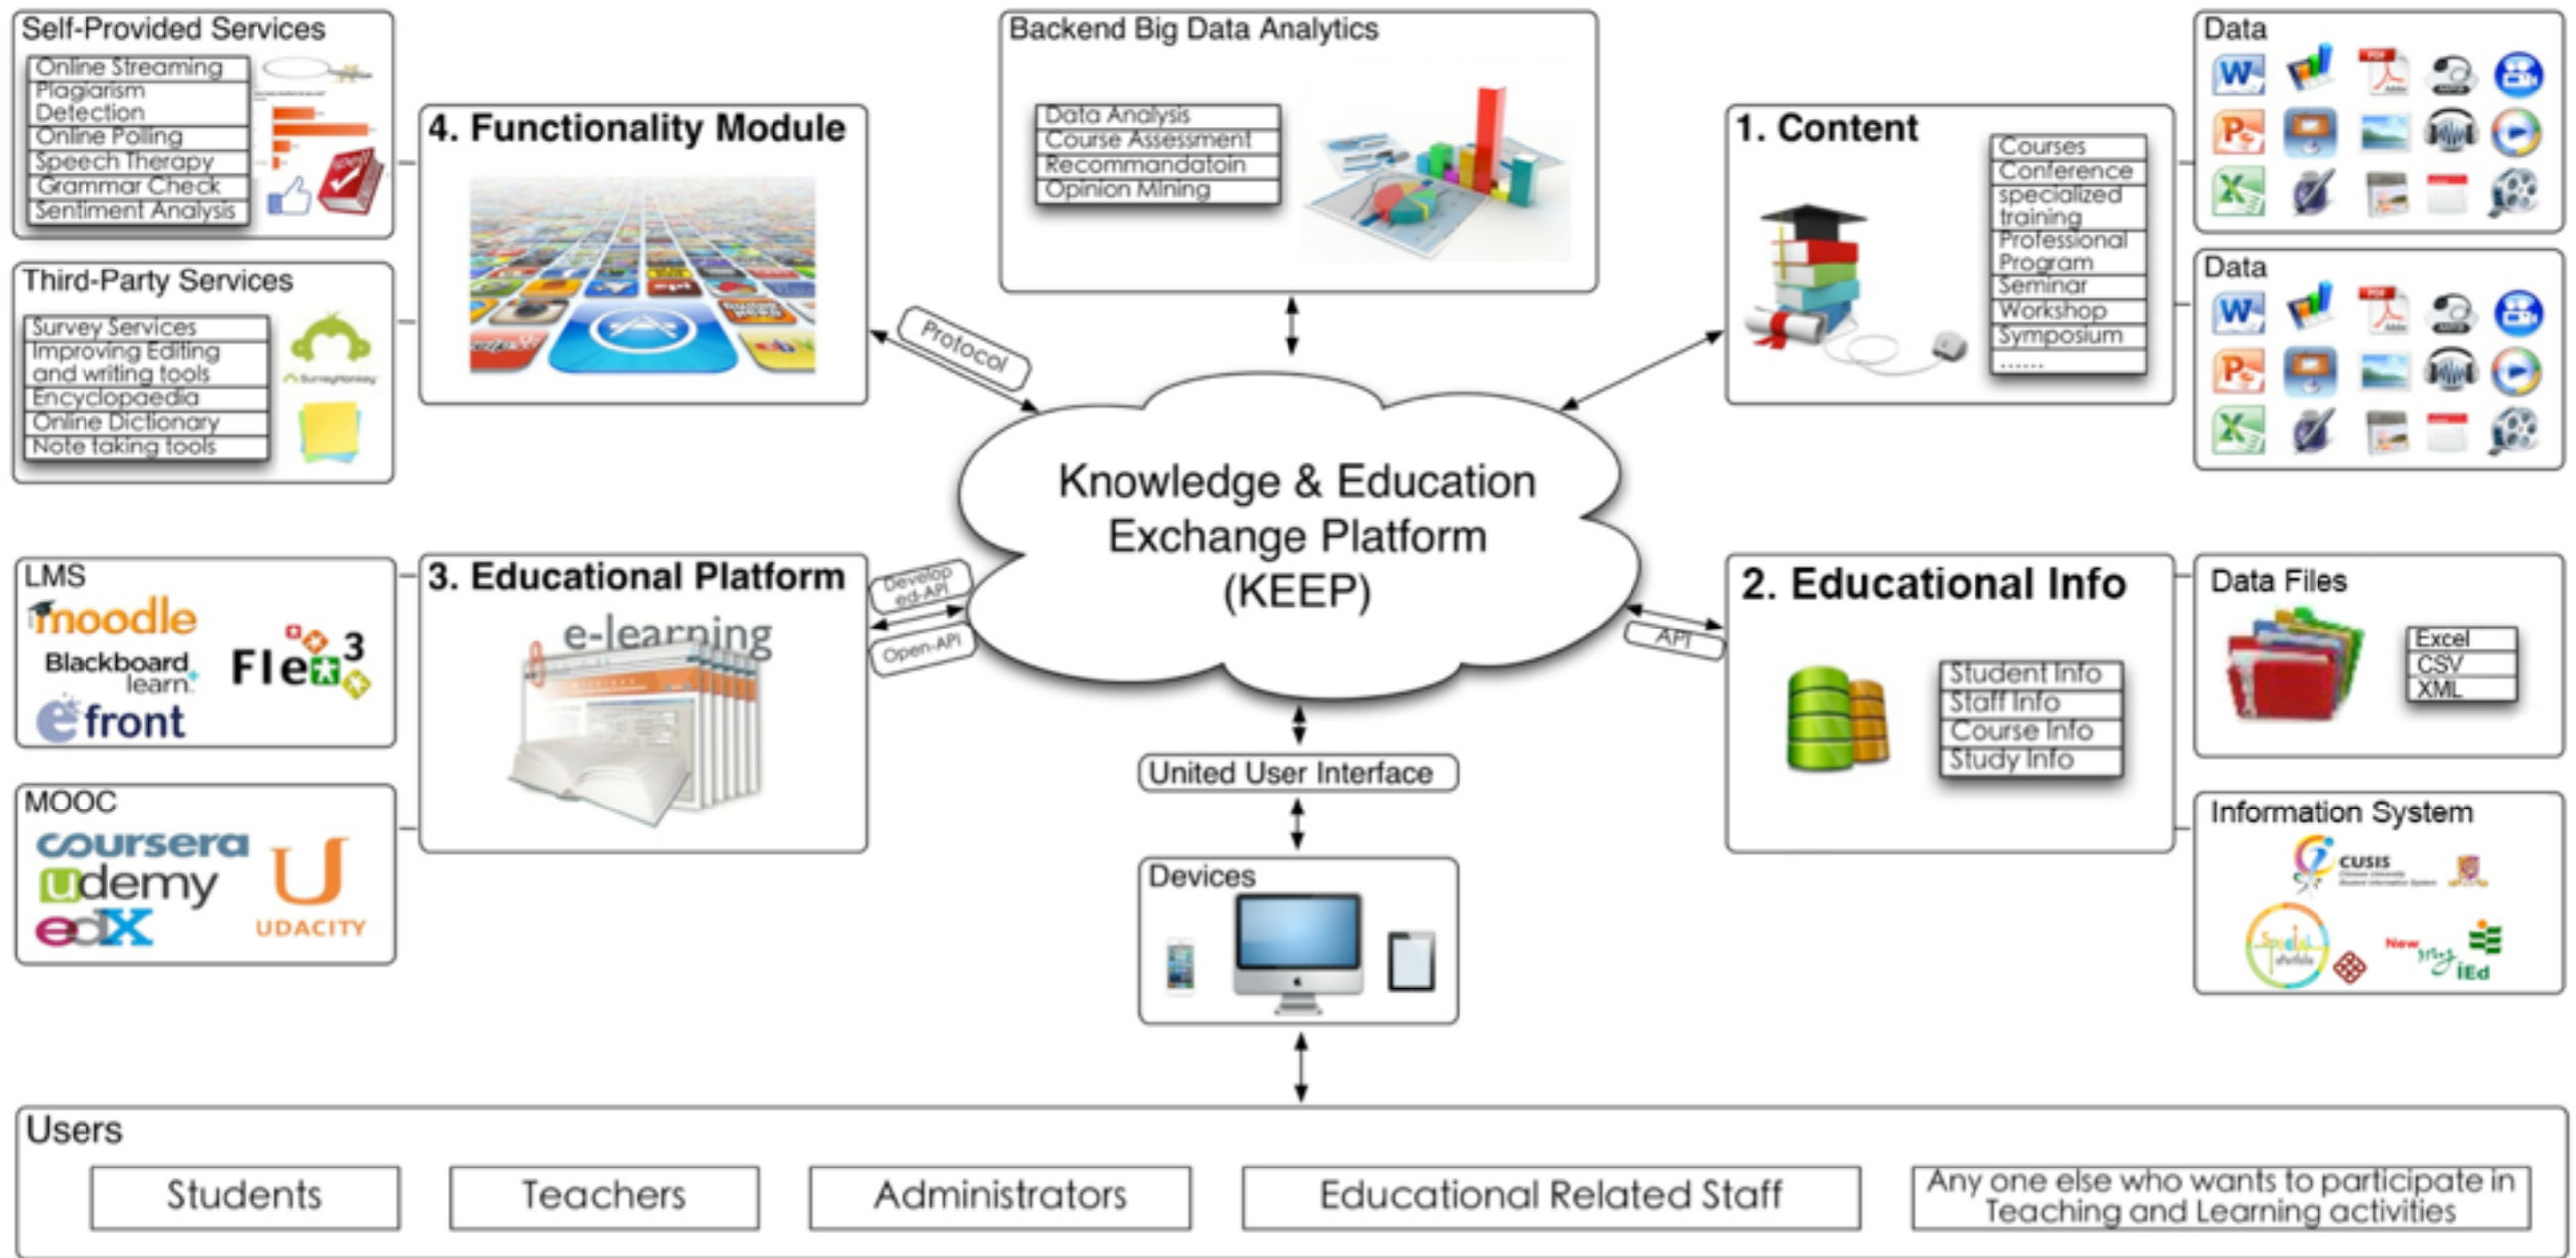

- Organize and search accessible and useful materials
- Gain fresh insights through analytics
- Collect the best online courses
- Promote innovative education applications

KEEP's Partners & Alliances

KEEP Education Cloud

KEEP education cloud

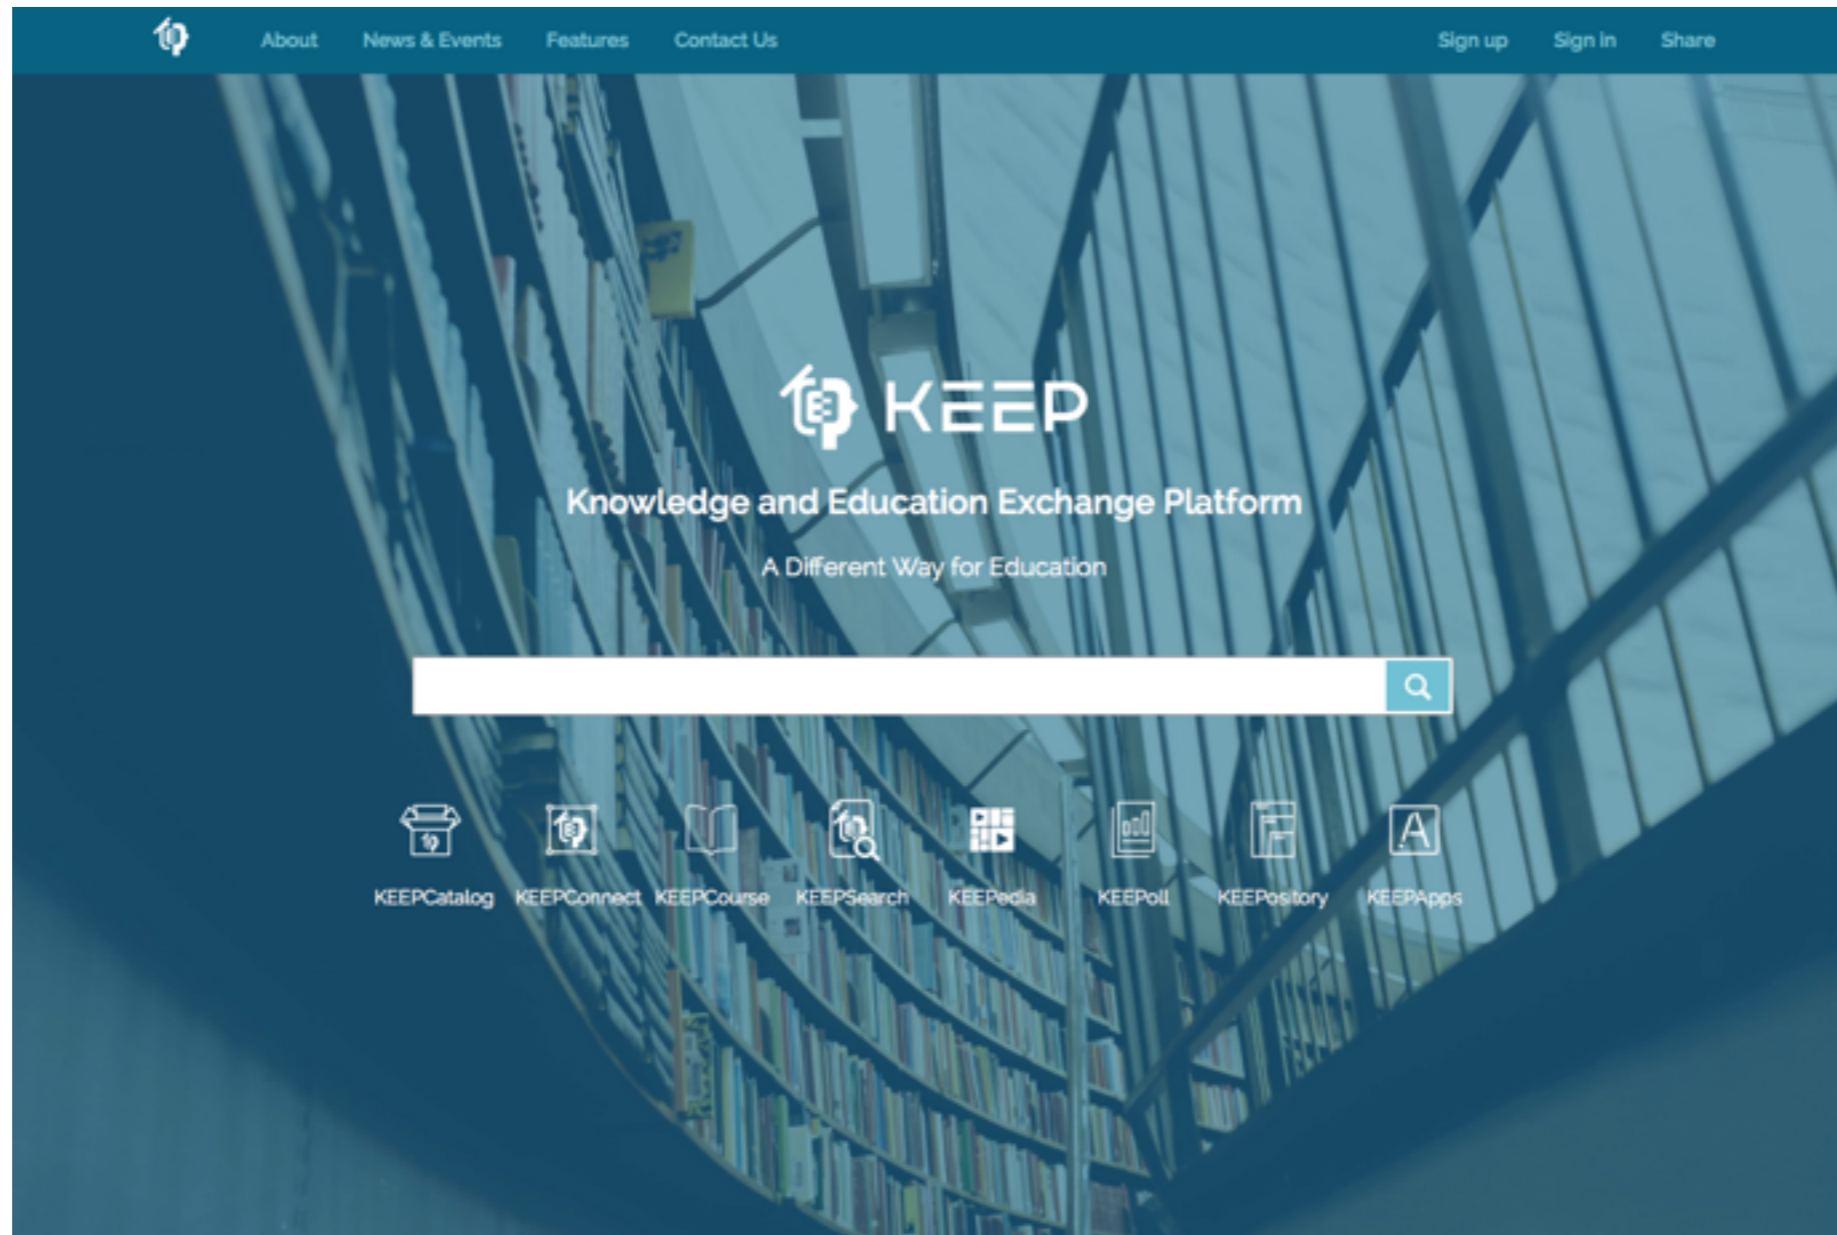

Big Education in the Era of Big Data @ IWAIT 2015, January 12, 2015. Tainan, Taiwan

KEEP Search

Problem we are facing:

- Various resources and information online
- People are struggling for these kind of resources
- Google and other search engine do not have this kind of ability that focus on education subject information searching

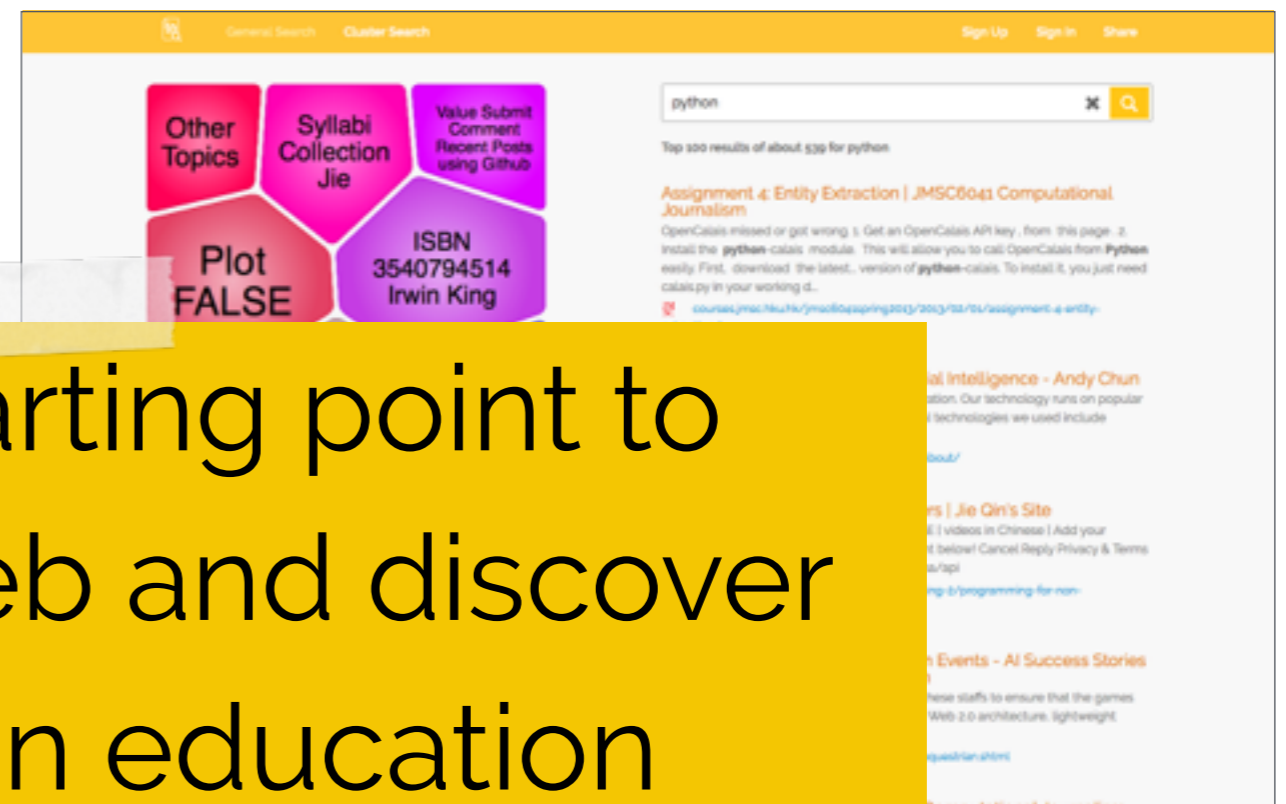

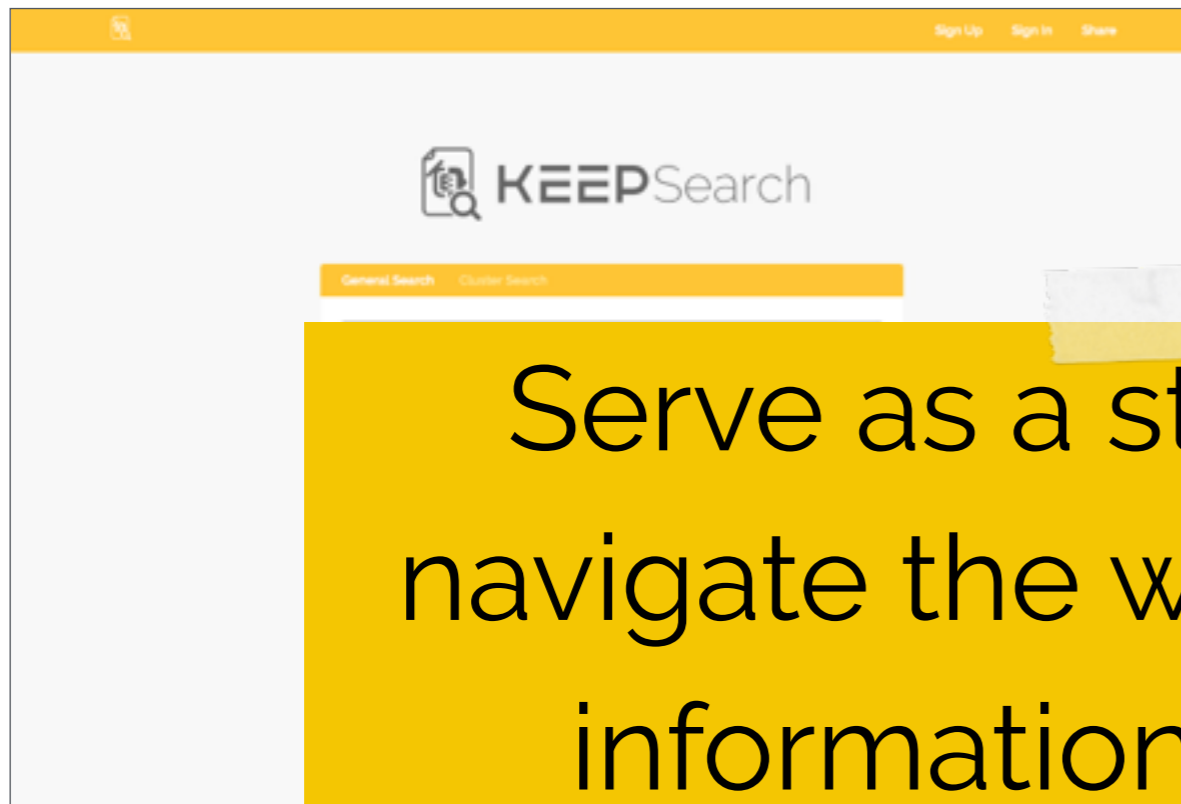

Benefit:

- Organize these kind of resources and information
- Bring the best and efficient way for people to retrieve useful and accessible resources

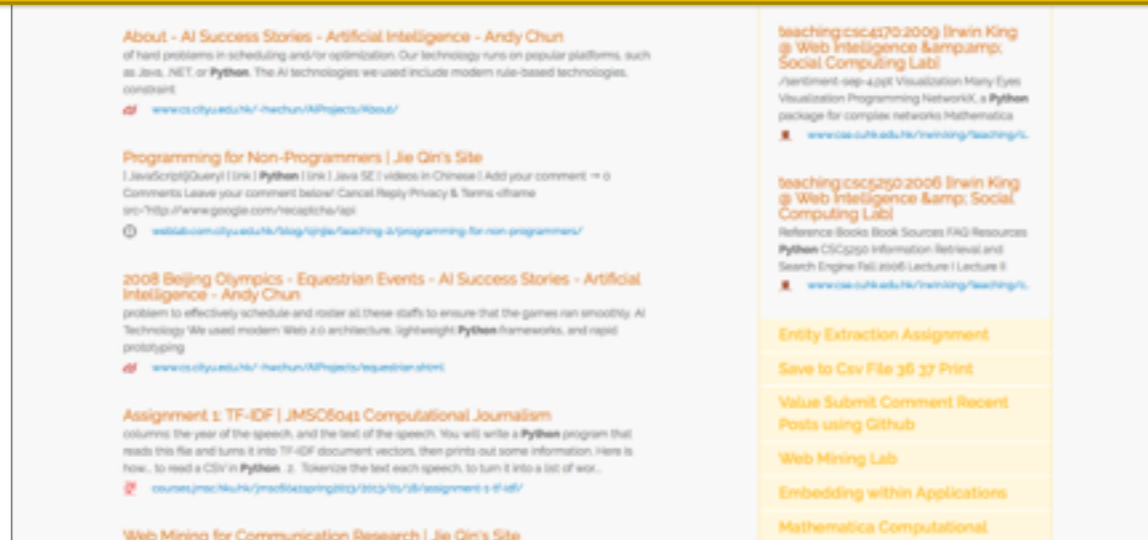

KEEP Search

Serve as a starting point to navigate the web and discover information in education

KEEPCourse

Problem we are facing:

- The idea of MOOC/LMS is popular around the world for a period of time
- Different kind of education platforms are built, and run independently e.g. Coursera, edX, Course Builder, Moodle, Sakai
- Learners have to visit them separately

Benefit:

- Provide one stop solution to search all kinds of courses from different platform
- Provide content hosting that helps educator to promote their courses

KEEPCourse

Provide users to seek, discover,
and share knowledge across
all platforms

KEEPedia

Problem we are facing:

- Few "integrated" / "one-stop" / "comprehensive" video delivery services designed for education and provide materials closely related to education purpose
- Few services have tracking ability to collect users video behavior data for learning analytics

Benefit:

- Each micro-module will focus on a single and simple topic
- Study a topic through comprehensive learning materials, e.g. video, text, exercise, quiz, etc.
- Able to track user behavior for learning analytics

Description:
A free file hosting service that offers cloud storage, file synchronisation, and client software. Dropbox is a file hosting service operated by Dropbox, Inc., headquartered in San Francisco, California, that offers cloud storage, file synchronization, personal cloud, and client software. Dropbox allows users to create a special folder on each of their computers, which Dropbox then synchronizes so that it appears to be the same folder (with the same contents) regardless of which computer is used to view it. Files placed in this folder also are accessible through a website and mobile phone applications. Dropbox, was founded in 2007 by Drew Houston and Arash Ferdowsi, as a Y Combinator startup company. Dropbox provides client software for Microsoft Windows, Mac OS X, Linux, Android, iOS, BlackBerry OS and web browsers, as well as unofficial ports to Symbian, Windows Phone, and MeeGo.

KEEPApps

Problem we are facing:

- Applications are too scattered
- Lack of available application data analytics online

Benefit:

- Facilitate the development and exhibition of innovative education applications
- Facilitate application data collection and behavior tracking

Originality
VeriGuide aims to promote academic integrity with VeriGuide's similarity detection capabilities.
[LEARN MORE](#)

VERIGUIDE

- Promote and uphold academic honesty, integrity, and quality
- Support similarity text detection in English, Traditional Chinese, and Simplified Chinese
- Provide class and assignment management via a graphical web interface
- Maintain assignment databases for institutions providing added security and privacy

WHAT'S NEW?

New service plans for various educational institutions have been released.

The Chinese University Plagiarism Identification Engine (CUPIE) is now renamed as VeriGuide.

We are pleased to introduce version 2.0 of VeriGuide: improved general processing of the system, better support of different types of file formats, speedier and more comprehensive Internet search, and many other behind the scene improvements.

Seventh Asian Conference on Machine Learning, Hong Kong

The Chinese University of Hong Kong and Hong Kong Science Park
November 20-22, 2015

ANNOUNCEMENTS

- We are calling for paper submissions, workshop proposals, and tutorial proposals.

ACML 2015

The 7th Asian Conference on Machine Learning (ACML2015) will be held in Hong Kong on November 20-22, 2015. The conference aims to provide a leading international forum for researchers in machine learning and related fields to share their new ideas, progresses and achievements. Submissions from regions other than the Asia-Pacific are also highly encouraged.

The conference calls for high-quality, original research papers in the theory and practice of machine learning. The conference also solicits proposals focusing on frontier research, new ideas and paradigms in machine learning. The conference proceedings will be published in The Journal of Machine Learning Research (JMLR): Workshop and Conference Proceedings series.

See the [Call for Papers](#) for details and submit through the [paper submission site](#).

FLORENCE, ITALY, MAY 19, 2015

[Home](#)[CFP](#)[Organizers](#)[Submission](#)[Registration](#)[Program](#)[Keynote Speakers](#)

Welcome to

BigScholar 2015

The Second WWW Workshop on
Big Scholarly Data: Towards the Web of Scholars
<http://msclab.org/big scholar/>

A workshop of WWW 2015 (The 24th International World Wide Web Conference)
Florence, Italy, May 19, 2015

The BigScholar 2015 workshop aims at bringing together researchers and practitioners working on Big Scholarly Data to discuss what are emerging research issues and how to explore the Web of Scholars. Several core challenges, such as the tools and methods for analyzing and mining scholarly data will be the main center of discussions at the workshop. The goal is to contribute to the birth of a community having a shared interest around the Web of Scholars and exploring it using data mining, recommender systems, social network analysis and other appropriate technologies.

The workshop will be a half-day workshop. The format of the workshop will include one invited talk (keynote), research and position paper presentations and one discussion panel. The workshop will be held in the afternoon on May 19, 2015 in Florence, Italy, in conjunction with the 24th International World Wide Web Conference (WWW 2015).

Important Dates

Paper submissions due:

Jan 24, 2015

Notification of acceptance:

Feb 22, 2015

Camera ready version due:

Big Education in the Era of Big Data @ IWAIT 2015, January 12, 2015. Tainan, Taiwan

SOCIAL MEDIA & SOCIAL COMPUTING

CALL FOR BOOKS!

The Social Media and Social Computing Series focuses on publishing high quality references in the rapidly emerging area of social media and social computing. Both experimental/practical as well as theoretical investigations are welcome. The series targets both scholars and practitioners in social media and social computing for work in the intersection of computer science, information technology, psychology, economics, education and other social sciences. The advent of the Internet and the Web has resulted in social interactions and behaviors through the use of technologies and web services, e.g., hardware devices such as smart phones, tablets, RFID, etc., software services such as wikis, blogs, micro-blogs, social network sites, recommender systems, social bookmarking, social news, multimedia sharing sites, etc. Analyzing these technologically-enabled interactions in their social context will benefit information providers and information consumers. However, the large volume and scale of user-generated contents require effective modeling methods and efficient algorithms to handle these challenging problems.

Series Editor:

[Irwin King](#)

Prof. King is Associate Editor of the IEEE Transactions on Neural Networks (TNN) and IEEE Computational Intelligence Magazine (CIM). He is a senior member of IEEE and a member of ACM, International Neural Network Society (INNS), and VP & Governing Board Member of the Asian Pacific Neural Network Assembly (APNNA). He serves the Neural Network Technical Committee (NNTC) and the Data Mining Technical Committee under the IEEE Computational Intelligence Society.
