Year of Establishment

1963

(through amalgamation of
Chung Chi College,
New Asia College
and United College)

Motto

博文約禮

Through Learning and
Temperance to Virtue

Our Vision

To be acknowledged locally, nationally and internationally as a first-class comprehensive research university whose bilingual and multicultural dimensions of student education, scholarly output and contribution to the community consistently meet standards of excellence.

Our Mission

To assist in the preservation, creation, application and dissemination of knowledge by teaching, research and public service in a comprehensive range of disciplines, thereby serving the needs and enhancing the well-being of the citizens of Hong Kong, China as a whole, and the wider world community.

Emblem and Colours

The emblem of the University is the mythical Chinese bird *feng* (鳳) which has been regarded as the Bird of the South since the Han dynasty. It is a symbol of nobility, beauty, loyalty and majesty. The University colours are purple and gold, representing devotion and loyalty, and perseverance and resolution, respectively.

Campus

Campus Area
137.3
hectares

Buildings on
Campus
169

Total Gross
Floor Area
820,856^{m²}

Main Campus

The University's stunning campus commanding panoramic views of the Tolo Harbour and the mountain range nearby is the largest in Hong Kong. Nestled among the greenery are tasteful buildings featuring a mix of Chinese and Western architectural styles. The campus is a haven for many varieties of flora and fauna.

Teaching Centres in Town

The Graduate Law Centre, the MBA Town Centre, and one of the enrolment and learning centres of the CUHK School of Continuing and Professional Studies are housed at the Bank of America Tower in Admiralty, Hong Kong.

Prince of Wales Hospital

Situated in Siu Lek Yuen, Shatin, the Prince of Wales Hospital is the teaching hospital of the Faculty of Medicine of CUHK, offering training for medical professionals and the ground for medical research. It also houses most departments of the Faculty and several CUHK research institutes.

Shenzhen Research Institute

Situated in the Shenzhen Virtual University Park in Nanshan, the Shenzhen Research Institute, wholly-owned by CUHK, was officially opened in November 2011. It serves as a pivotal base for CUHK staff members to conduct research, training and technology transfer in mainland China.

Winner of Guanghua Engineering Science and Technology Award	1
Winner of XPLOER PRIZE	1
Winner of Breakthrough Prize in Life Sciences	1
Awarded project of Civic and Community category in World Architecture Festival 2019	1

Strategic Research Areas and Themes

CUHK's research strategies aim to realize its vision as a centre of excellence for developing cutting-edge research and emerging interdisciplinary strengths that have global impact and significant contributions to society, through translating research findings into practical applications. Riding on our current research strengths, four major research areas incorporating 16 cross-cutting themes have been identified in the CUHK Strategic Plan 2016–2020.

China Studies

- China's Global Challenges
- Roots of Chinese Culture

Translational Biomedicine

- Genetic, Genomic and Precision Medicine
- Stem Cell Biology and Regenerative Medicine
- Brain and Mind
- Integrative Medicine
- Innovative Medical Devices

Environment and Sustainability

- Smart and Sustainable Cities
- Climate Change
- Plant Molecular, Cell and Agricultural Biology and Food Security
- Renewable Energy and Natural Resources
- Population Studies: Migration, Youth Development and Ageing Management

Information and Automation Technology

- Intelligent Reasoning and Cognition
- Big Data and eLearning Research
- Robotics
- Network Coding

Areas of Excellence

The University Grants Committee (UGC)* has provided preferential funding to the local tertiary institutions to conduct cutting-edge research. Three such Areas of Excellence (AoE) projects are currently led by researchers at CUHK:

Centre for Organelle Biogenesis and Function

The centre focuses on understanding the biogenesis and functions of three organelles, namely, Golgi, TGN and EXPO. This research will not only address the fundamental questions concerning organelle biogenesis and functions in important biological processes, such as cell wall formation and stress signalling pathways in plants, but will also have potential applications for the biotechnology industry in Hong Kong and China.

Centre for Genomic Studies on Plant-Environment Interaction for Sustainable Agriculture and Food Security

With the research foci on the understanding of plant adaptation to abiotic stresses, and the mechanisms of gene regulation relating to plant-environment interactions, the centre aims to identify useful functional genes and effective molecular markers to help generating new adaptive varieties to combat major factors hampering sustainable agriculture, including water scarcity, global warming, and topsoil nutrient depletion. The centre pledges to establish a stable soybean genetic population with precise annotated genomic information and deposit the data in a central portal, and contributes to food security through international collaboration and information sharing.

Probing the Fundamental Structure of Matter with High Energy Particle Collisions

As an active member of the A Toroidal LHC Apparatus (ATLAS) experiment at the Large Hadron Collider at the European Organization for Nuclear Research in Asia-Pacific region, the project team has established the Higgs particle's spin and parity and couplings to Standard Model particles, and designed new strategies for probing Physics Beyond the Standard Model (BSM). Analysis tools have been developed, complete with an ATLAS Tier-2 computing centre in Hong Kong. The team intends to measure the Higgs properties, search for BSM physics, develop particle physics theories and contribute to the ATLAS detector upgrade and to the R&D for the proposed Circular Electron-Positron Collider in China, as well as to develop enhanced techniques in Big Data computing and machine learning.

* The UGC is an advisory body responsible for advising the HKSAR Government on the development and funding needs of the higher learning institutions in Hong Kong

State Key Laboratories

State Key Laboratory of Translational Oncology (The Chinese University of Hong Kong)

Backed by a strong clinical base, the laboratory, established in 2006, conducts research into the early detection of cancers particularly prevalent in Asian populations, and seeks to develop novel therapeutics for the treatment.

State Key Laboratory of Agrobiotechnology (The Chinese University of Hong Kong)

The laboratory was established in 2008 with the mission of up-scaling China's agricultural technology to increase agricultural productivity, safeguarding food security in China, and improving people's nutrition by combining the traditional wisdom of farmers and breeders and modern biotechnology.

State Key Laboratory of Research on Bioactivities and Clinical Applications of Medicinal Plants (The Chinese University of Hong Kong)

By drawing on the expertise in research into Chinese medicinal plants developed both at CUHK and in the Kunming Institute of Botany, Chinese Academy of Sciences, the laboratory, established in 2009, aims to conduct research into the modernization of traditional Chinese medicine and the application of biotechnology in medical science.

State Key Laboratory of Digestive Disease (The Chinese University of Hong Kong)

Established in 2013, the laboratory aims to promote research and improve the level of diagnosis and treatment of digestive disease by carrying out basic, translational and clinical research on gastrointestinal cancer, peptic ulcer bleeding, chronic liver disease and inflammatory bowel disease.

State Key Laboratory of Synthetic Chemistry

Established in 2010 in partnership with the University of Hong Kong and the State Key Laboratory of Organometallic Chemistry located in the Shanghai Institute of Organic Chemistry, the Chinese Academy of Sciences, the laboratory aims to create and identify novel chemical compounds with important structural and bonding features or with notable potential for practical applications.

Research Institutes

- The Asia-Pacific Institute of Business
- Asian Institute of Supply Chains and Logistic
- Brain and Mind Institute
- CUHK Hong Kong-Shenzhen Innovation and Technology Research Institute (Futian)
- CUHK Institute of Health Equity
- CUHK Jockey Club Institute of Ageing
- CUHK T Stone Robotics Institute
- Heart and Vascular Institute
- Hong Kong Cancer Institute
- Hong Kong Hub of Paediatric Excellence
- Hong Kong Institute of Asia-Pacific Studies
- Hong Kong Institute of Diabetes and Obesity
- Hong Kong Institute of Educational Research
- Hong Kong Institute of Integrative Medicine
- Hong Kong Institute of Quantum Information Science and Technology
- Institute for Tissue Engineering and Regenerative Medicine
- Institute of Biotechnology
- Institute of Chinese Medicine
- Institute of Chinese Studies
- Institute of Digestive Disease
- Institute of Environment, Energy and Sustainability
- Institute of Future Cities
- Institute of Human Communicative Research
- Institute of Intelligent Design and Manufacturing
- The Institute of Mathematical Sciences
- Institute of Network Coding
- Institute of Optical Science and Technology
- Institute of Plant Molecular Biology and Agricultural Biotechnology
- Institute of Space and Earth Information Science
- Institute of Theoretical Computer Science and Communications
- Institute of Theoretical Physics
- Lau Chor Tak Institute of Global Economics and Finance
- Li Ka Shing Institute of Health Sciences
- Lui Che Woo Institute of Innovative Medicine
- Peter Hung Pain Research Institute
- Shenzhen Research Institute
- Shun Hing Institute of Advanced Engineering

Meeting and Outdoor Venues

University Mall

Lined between the University Library and the Science Centre, the University Mall is the most famous icon on campus. It is also the place for the University's annual congregation.

The Gate of Wisdom and the Beacon

The broad rectangular base of the sculpture *The Gate of Wisdom*, also known as the Beacon, is a popular place for student activities, especially public forums and ceremonies.

Cho Yiu Conference Hall

The 162-seat conference room is equipped with simultaneous interpretation system and projection screen for video-conferencing. Portraits of past chancellors, council chairmen and vice-chancellors adorn its walls.

Cultural Square

Outside the Benjamin Franklin Centre, a popular place for student activities including open-air concerts, drama, as well as cultural festivals.

Henry Cheng International Conference Centre (HCICC)

Located at Cheng Yu Tung Building and adjacent to the teaching hotel and MTR station, HCICC provides 15 multi-purpose conference venues including a large theatre for 460 scholars and rooms of small and medium sizes. Areas for conference catering and academic poster exhibition are also available, making it an ideal venue for hosting international academic conferences.
