

Remark on homework submission:

You need to submit your homework on Gradescope: [Link to Gradescope for MATH3060](#)

I would be grateful if you could pay attention to the following:

- Please use a pen if you are writing on a paper. Pencils are hard to read.
- Please do not use papers with background. Note paper is acceptable.
- Please do not write all your solutions on one single page, which is very difficult to read.
- Please scan your homework properly using scanner apps on your phone, instead of uploading pictures of your homework.

The way I grade your homework:

- Every question word is worth 5 points, for example, "show that", "discuss", "compare", "prove that" etc. each worths 5 points.
- I will deduct marks from you if:
 - You missed a question word (-5 points)
 - You missed some details, for example, instead of showing, simply write "easy to see", "trivial", "obvious". (-1 to -4 points, depends)
 - You quoted a useful fact, for example, a proposition, a theorem etc. outside from the lecture notes without proving it. (-5 points)
- Comments are available in Gradescope

You will find your marked homework on Gradescope few days after the deadline of the HW.

Thank you very much :)

Luca Lee
