

## Comments on Midterm Exam

1. The mean of the midterm exam is 63/100. About 8 got scores above 97.
2. Five had scores around 40. To pass the course a final score around 45 is needed. It means that they must work harder. Extra scores can be earned by handing in all classworks, assignments and taking all the remaining quizzes.
3. Four had scores lower than 35. They are on the risky side. Please contact me if you really want to pass it.
4. The final exam is supposed to be harder.
5. In previous years I used to hold special tutorials for those under-performed, but this year I am fully occupied by 2050C, a course new to me. I am not able to conduct special tutorials this year, sorry about that.
