

# The Evolution of Data Science and its Impact on the Environmental Sciences

**Professor William W. Hsieh**  
(謝瑋教授)

*Department of Earth, Ocean and Atmospheric Sciences  
The University of British Columbia*

**10 November 2017**

**11:30 a.m.**

**Conference Room, 3/F  
Mong Man Wai Building**

Thirty years ago, data science was dominated by Statistics. Today, it is by Machine Learning. How and why this sea change occurred will be examined. New ways to tackle problems in environmental sciences are now possible with machine learning.
