

THE CHINESE UNIVERSITY OF HONG KONG

Department of Statistics

will present a seminar entitled

Regression Analysis with Semiparametric Transformation Models

by

Professor Zhiliang YING

Department of Statistics

Columbia University

on

Tuesday, 19 December 2006

2:00 pm – 3:00 pm

in

Lady Shaw Building 241

The Chinese University of Hong Kong

Abstract:

Semiparametric transformation models are a rich class of regression models that have drawn much interest among researchers in statistics, biostatistics and econometrics. They provide a unified formulation for many commonly encountered models and thereby making it possible for general treatment. In this talk, I will give an overview of these models and their applications to various problems. Particular attention will be given to some recent developments.
