

## 5 - Flipped Teaching for Excellence in Methodology Training for Teachers of English in Primary and Secondary Schools

Tools / Services	Pedagogical Uses
<p>Explain Everything, which is used on an iPad, is a handy application for producing pre-class videos, which can then be easily uploaded to Youtube. This app allows direct import of existing PPT files, which can then be narrated on directly using the built-in narration function. Alternatively, presentations can be created from scratch using the various frame templates provided. The app has contains several useful tools, such as highlighting, animation effects, etc., which can simulate real-time presentations. Overall, it is a highly useful tool for creating pre-class presentation videos.</p> <p>Other tools for creating the post-viewing class activities:</p> <ul style="list-style-type: none"> <li>- Post-viewing quizzes: Quiz construction tool within Blackboard;</li> <li>- Class presentations; worksheets; etc: WORD; PPT; and other applications as may be needed.</li> </ul>	<p>The primary users of the MMCD are pre-service and in-service enrolled on the SCT course (subject curriculum and teaching: English) PGDP5001. Their normal classes finished around mid-February, 2015. Hence, so far, the flipped classroom activities planned have not been tried out with students. The 8 micro-modules will be used in full swing from September 2015 with the new cohorts of students.</p>
