

Biology programme learning outcomes (PLOs)

Knowledge	
PLO1	Basic knowledge in biology, including diversity and functioning of various living organisms
PLO2	In-depth understanding in at least one major area of biology, such as physiology, ecology and evolution, and human biology
Skills	
PLO3	Basic techniques, including data analyses, in at least one major line of modern biological research, including molecular biology, physiology and field biology
PLO4	Skills in scientific writing, reading comprehension and oral communication
PLO5	Ability to work independently and in a team
PLO6	Ability to use basic statistics and computer skills to process and analyze scientific data
PLO7	Competence in using information technologies
PLO8	Ability to use scientific method in problem solving
Values and attitude	
PLO9	Appreciation of biological knowledge
PLO10	Sense of biological conservation and other environmental issues
PLO11	Awareness on the latest developments and advancements in biology
