With 2013 about to end in a couple of months' time, have you started making your plans for Year 2014?

Here comes the CUHK Mentorship Programme (CUMP) for your consideration, especially for those who would like to:

- broaden your social and personal **perspectives**;
- obtain advice for **career planning and development**; or
- build up useful **networks** for future development.

Organized by the Career Planning and Development Centre, the CUMP is a one-year mentorship programme (from January to December) that seeks to invite seasoned professionals and senior executives from diverse fields and active recruiting companies as mentors, and arrange **mentor-mentee matching based on the career interests** of the students as far as possible. Through the Programme, you would gain insights on how to better develop your career and yourself through regular interactions with a successful person at personal level.

All full-time non-final year undergraduate students and postgraduate students with graduation after December 2014 are welcome to apply for this one-year programme.

The application deadline is **18 November 2013 (Monday)**. Please refer to CUMP website at <http://cpdc.osa.cuhk.edu.hk/student/programmes-workshops/CUMP> for the programme details and application procedure.

Sharing by CUHK Student Grace Kuan, Bank of America Merrill Lynch Summer Analyst Class 2013

As a final year undergraduate Engineering student at The Chinese University of Hong Kong, I joined Bank of America Merrill Lynch's Technology Developer & Analyst Summer Internship Program. I was assigned to the Fixed Income, Credit & Currencies (FICC) Technology team which provides electronic trading platforms for spot, forward, swap and option transactions in major, minor and emerging market currencies. During this 10-week on-the-job training, I worked with the project managers on a system migration project which provided me the opportunity to interact with very talented people from diverse cultures and backgrounds.

Bank of America Merrill Lynch takes their internship program seriously, as they offer multiple business speaking series discussions, presenting interns with a deeper understanding of the various fields within banking. There was a great amount of trust bestowed upon the analysts, which allowed us to expand our knowledge of the investment banking industry while developing important analytical and communication skills. I even once was given the opportunity to work on the trading floor.

The Summer Analyst Internship Program is definitely a rewarding experience. I strongly recommend Technology students interested in the finance industry to apply for an internship at the firm. I feel that I have made the right decision in joining Bank of America Merrill Lynch's Technology Developer & Analyst Full Time Program this fall.
