

Two-Day Workshop on The Use of Story-telling in Counseling and Conducting Therapeutic Groups

Introduction

How can story-telling lead you into experiences which you have never encountered before? How can story-telling help you discover a new self? How can story-telling make you feel at most ease when sharing your feelings and emotions with the therapeutic group? How the ending of a story can bring you unexpected sensations and strengths? You will find the answers to all these questions in the workshop.

The workshop covers the discovery of the subconscious, skills of story-telling and the use of metaphors in a variety of therapeutic settings. The all-embracing feature of story-telling makes it a perfect companion with other methods of psychological interventions such as projective drawing, play, art, music, and drama therapies as well as solution focused, hypnotic and cognitive-behavioral approaches.

In the workshop, through live demonstrations by the trainer and group discussions, participants will not only apprehend the power of story-telling in effective communication and psychotherapy, but will also witness the magical moment of realization of the subconscious through the story-telling of live demonstrators. Besides, participants will also learn that story-telling embraces many important characteristics.
