

About the Link University Scholarship

Established in 2015, the Link University Scholarship gives recognition to outstanding students who are the first in three generations of their families admitted to a local university and have performed well in their studies, and who are also active in extra-curricular activities and community services. The Selection Panel is composed of representatives from Link, the public, business, and education sectors, and non-profit and non-government organisations. Link will interview the shortlisted applicants to assess their capabilities as well as commitment to the community. Apart from the scholarship of HK\$20,000 each, awardees will be automatically admitted to the Link Scholars Alumni, through which Link provides opportunities in career development, community service and gives priority consideration for the company's internship programme. Effective from 2021/22, Link has expanded eligibility for its scholarship programme to a total of 11 participating local universities and the number of awards has increased to 220.
