

# Final exam arrangement of Math 4220

April 21, 2021

The course will have online final examination (3 hours) with self-arranged invigilation. It covers all the material from Chapter 1 to Chapter 7. The time is from 9:30 to 12:30 on 4 May. I will distribute the question paper by Zoom (ID: 996 7660 2225 and Password: 712850). Please come to Zoom before 9:15 am input your name and student ID No. into the chat when you are there. You should upload your answer paper to Blackboard before 13:00.

**ATTENTION:**

- You can refer the textbook or lecture notes but not copy others' answers. If more than 2 sentences from the answer of any 2 students are found to be principally the same, the students concerned will be requested to present the topics to determine if one student copied any part from the other. If 2 students are found to have copied more than 2 sentences from each other, no any scores would be counted for the answer for both students involved.
