

CUHK Ophthalmic Microsurgical Training Centre

EVO ICL (Implantable Collamer Lens) Workshop (Part II)

Date : 2022 SEP 29 (Thur)

Time : 19:30 -22:00

Venue: OMTC, 3/F, Hong Kong Eye Hospital

Target Participants:

- 4th year or above Ophthalmology Resident Trainees of the Hong Kong Hospital Authority
- Ophthalmologists who are competent with Phacoemulsification and are interested in ICL

ICL designed to provide premium refractive outcomes while optimizing patient comfort. Made from Collamer®, ICL is a small, soft, foldable and flexible posterior chamber UV absorption lens which treats a wide range of refractive error without removing corneal tissue or natural lens. For more than 20 years, ICL series have been providing exceptional vision with more than 2,000,000 lenses implanted worldwide.
