

THE CHINESE UNIVERSITY OF HONG KONG
Department of Mathematics
MATH2020B (Spring Term, 2021)
Advanced Calculus II
Instructions for Submission of Assignments

You need to submit your homework on Gradescope: [Link to Gradescope for MATH2020B](#)

Please follow the guidelines below:

- Multiple submission is allowed, only the latest submission will be graded.
- No late submission will be accepted.
- Submit one PDF file only (**DO NOT** simply take photos as “jpg” is not compatible with Gradescope; better keep file size small to avoid risk in uploading to Gradescope; using multiple files has the risk of missing some of them in grading).
- “Match” your solution to the provided “outline” (or questions) when uploading to Gradescope. If the solution to a question is written across multiple pages, select all these pages as one solution. (There should not be more than one question on any single page as it is required to start a new page for each question, see item (iv) above.) If the solution to a question left blank, write down the question number and the word “blank” on a piece of paper, and match the “blank” page to the corresponding outline.
- Black or blue pen are required for handwriting works. Avoid using pencil or other color pen, otherwise it will be difficult to create a clear PDF image.
- You can also type your homework in \LaTeX .
