About Future17

Future17 is about bringing together students from different cultural backgrounds and educational settings to collaborate and develop solutions that can tackle some of the grand challenges confronting societies globally, from climate change to social inequality to world hunger. The programme not only enables researchers to play a role by contributing their expertise, but also helps students develop the tools needed to implement the SDGs.

The 11 project goals were defined by SDG Challenge Partners, which include Axel Springer SE, Camplus Iberica (Spain and Portugal), Climate and Cryosphere (CliC), Diversey – Soap for Hope, Geneva Consensus Foundation, The Green Rebel, QS World Merit, T-Hues, the UN PRME Working Group on Climate Change and Environment, and Women in BizEd.
