A Bit of History

Jian Sun, "Introduction to Computer Vision and Deep Learning".

Winter of Neural Networks (mid 90' – 2006)

- The rises of SVM, Random forest
- No theory to play
- Lack of training data
- Benchmark is insensitive
- Difficulties in optimization
- Hard to reproduce results

Curse

"Deep neural networks are no good and could never be trained."

Renaissance of Deep Learning (2006 -)

- A fast learning algorithm for deep belief nets. [Hinton et.al 1996]
- Data + Computing + Industry Competition
- NVidia's GPU, Google Brain (16,000 CPUs)
- Speech: Microsoft [2010], Google [2011], IBM
- Image: AlexNet, 8 layers [Krizhevsky et.al 2012] (26.2% -> 15.3%)
