THE POLYFUNCTIONAL NA⁷/NA² 那 IN EARLY SOUTHERN MIN AND ITS LATER DEVELOPMENTS

Chinfa Lien

National Tsing Hua University, Taiwan

ABSTRACT

The paper deals with the polyfunctionality of 那 realized as *na*⁷ or *na*² featuring a range of senses or functions such as *if*, *only*, *look like* and *how/why* in earlier Southern Min and its later developments in modern Southern Min based on a set of data reflecting three periods dating back to the sixteenth at the earliest. Special attention is focused on the patterns of syntactic distribution of *na*⁷/*na*² 那 in conjunction with its associated senses and a range of constructions it features such as conditionals, causals, and correlatives denoting simultaneous actions. A comparison of *na*⁷/*na*² 那 in earlier and modern Southern Min shows some interesting grammatical developments chiefly three trends: (i) the grammaticalization of the similitative verb *nak 若 in tandem with the proximal deictic element as a marker of the protasis in conditionals; (ii) the obsolescence of the sense of the monosyllabic *na*⁷ ‘only’ and emergence of correlative construction *na*² X *na*² Y featuring the incremental intensification even beyond the newly emergent simultaneous actions; and (iii) the emergence of robust occurrence of *na*² 那 as a how/why WH-word. The grammatical development is partially manifested in the intriguing recurrence of hyper-

Acknowledgements I would like to thank the anonymous reviewers for insightful comments and suggestions which led to substantial improvement of the original versions. The paper is gratefully based on a research project (NSC 103-2923-H-007-001). Thanks are also due to Liwei Liu and Yu-ju Yang for their editorial assistance.

Conditional Alternation Correlative Southern Min

1. INTRODUCTION

The paper explores the polyfunctionality of 那 in Southern Min from a diachronic perspective. It is mainly focused on the syntactic distribution and semantic properties of *na²/na⁷* 那 based on early and modern texts. It aims at unfolding the multiple form and meaning relationship as manifested in *na²/na⁷* 那 and pinning down in particular the intimate relationship between conditionals and disjunction among many other interlocking semantic links. At the outset I will give a brief literature review of conditionals from a cross-linguistic perspective that furnish a theoretical framework for the discussion in the body of the paper.

Conditionals are a grammatical category. A question arises as to how they emerge. Haiman (1978, 1985) claims that conditionals may owe their origin to topics. Traugott (1985) suggests five sources for conditional markers: (1) words for modality, especially epistemic modality, (2) existential copulas, (3) interrogatives, (4) topic markers or demonstratives, and (5) temporal expressions.

Haiman pioneers the notion of topic as the source of conditionals, as he notes, “conditionals like other topics are established in discourse as given facts or entities with a formal device whereby the speaker seeks the agreement of his interlocutors as to their validity” (Haiman 1978: 572). But there is also a similarity of conditionals and question. Ultimately markers of conditional protasis are a result of grammaticalization of interrogative markers, as Haiman (1978, 1985) points out. In particular, polar questions may be grammaticalized into conditional clauses (Heine et al. 1991: 25). Thus, both topicalization and interrogatives may be involved in the formation of conditionals.

Fillenbraum (1986) notes that there appears to be an intimate relationship between *unless* and *if not*. But on deeper thoughts, a more

早期闽南语 na^7/na^2 那的多功能性及其后来的演变

连金发

国立清华大学，台湾

摘要

本文根据文献就闽南语“那”指称「如果」、「只有」、「像似」、「怎么」等多重功能，追索十六世纪以来明清时期到现代的演变，着重于考察“那”(na^7/na^2)的句法分布及相关条件，动因，表同时性动作的联结句式。从早期和现代闽南语 na^7/na^2 的比较可以看出引人入胜的语法演变，其中包括(i)「像似」动词「若」搭配近指指示词，语法化为条件前项目的标记，(ii) 单音节“那”「只有」的消退，闽南语句式 $na^2 X na^2 Y$ 的兴起，并从新兴的同时并行的语义，进而发展递增的并进程度义。(iii) 另外一项关连性演变是 na^2 产生反诘的「怎么」义。在语法演变过程中，功能同形成份常反复出现羨余的迭置现象。 na^7/na^2 与其他语词相搭配，一经复合化就跳脱了同音、歧义所造成的不利效应。
