

# 「生之動」的跨域共感： 時空意識、認識體系與描述的關鍵性

潘怡帆、鄭毓瑜、李育霖、周泰立、簡旭伸\*

跨領域研究在二十一世紀不只是重要的，也是急迫的一件事。面對暖化加劇、疫情蔓延，以及後人類時代的惘惘威脅，人與環境，與科技，與社會都出現了前所未見的新問題與新體驗；而啟發或是推助不同領域之間的「共感」，正是包容多元的體驗，回應彼此問題的關鍵。本文由文學，哲學，地理學，心理學等研究者合作，以「時空意識」、「認識體系」與「描述的關鍵性」做為對話的核心，嘗試提供抵達「共感」的可能途徑。

關鍵詞：跨領域 生之動 時空意識 認識體系 描述

# Interdisciplinary Sympathy in the “Movement of Life”: Spatio-temporal Awareness, Systems of Understanding, and the Importance of Description

PAN Yifan; Cheng Yu-Yu; Lee Yu-lin; Chou Tai-Li; Chien Shiuh-Shen\*

Interdisciplinary research is not only important, but a pressing issue in the twenty-first century. In the face of the increasing global warming, spread of epidemics, and the threat of a post-human era, humans are confronting unprecedented problems and experiences with the environment, technology, and society. Inspiring or enhancing the “sympathy” among different fields is the key to encompassing diverse experiences and responding to the problems with each other. This paper is a collaborative work of researchers from literature, philosophy, geography, and psychology, focusing, in particular, on such themes for dialogues as “spatio-temporal awareness,” “systems of understanding,” and the “importance of description.” It aims to shed light on possibilities in achieving “sympathy.”

**Keywords:** interdisciplinary the movement of life spatio-temporal awareness systems of understanding description
