

**Valiant™** Thoracic Stent Graft  
with the **Captivia™** Delivery  
System

**Medtronic**

# PROVEN DESIGN

The proven design and performance of the Valiant™ Captivia™ system offers a broad set of options to treat a wide range of patient anatomies.<sup>1-4</sup>

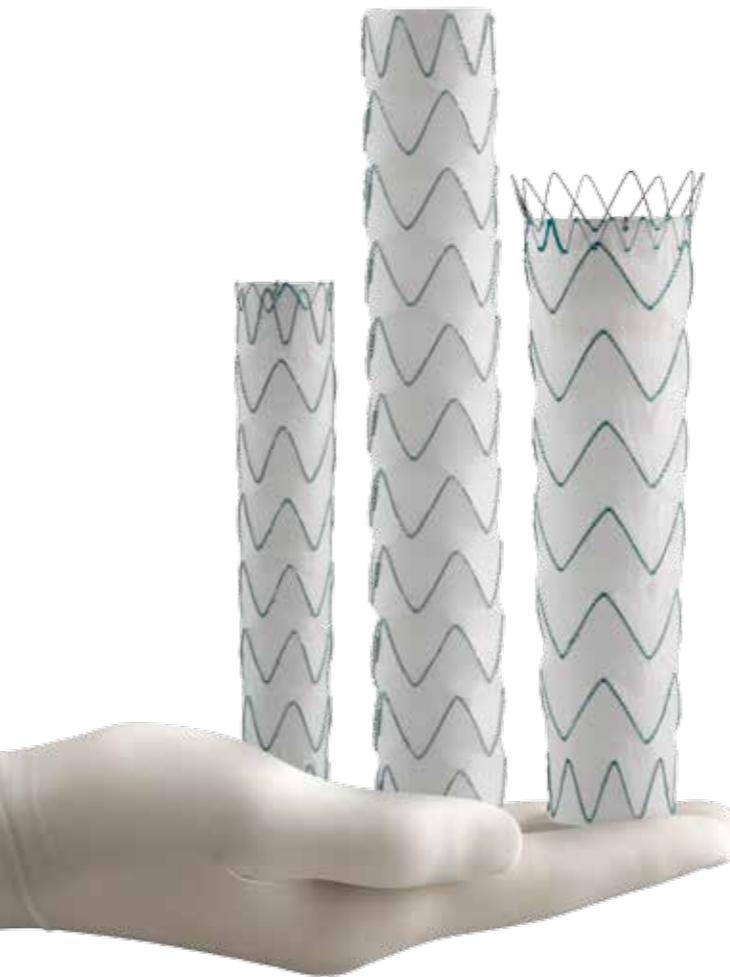

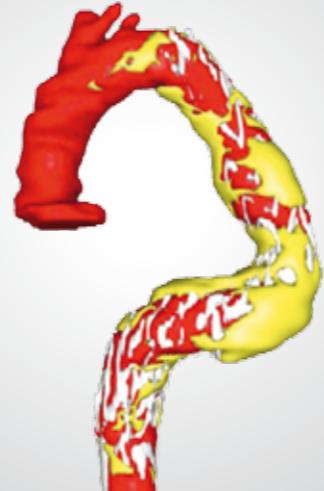

Proven design with enhanced conformability and kink resistance

Additional components to treat a wide range of anatomies

Consistent clinical performance across a variety of pathologies

The Valiant™ Captivia™ system with proximal FreeFlo tapers continues to deliver proven performance with additional components for broad patient suitability.

**A tapered stent graft should be preferred for the majority of patients with dissection.<sup>1</sup>**

The Valiant™ Captivia™ system with proximal FreeFlo tapers helps you treat more anatomies with confidence.

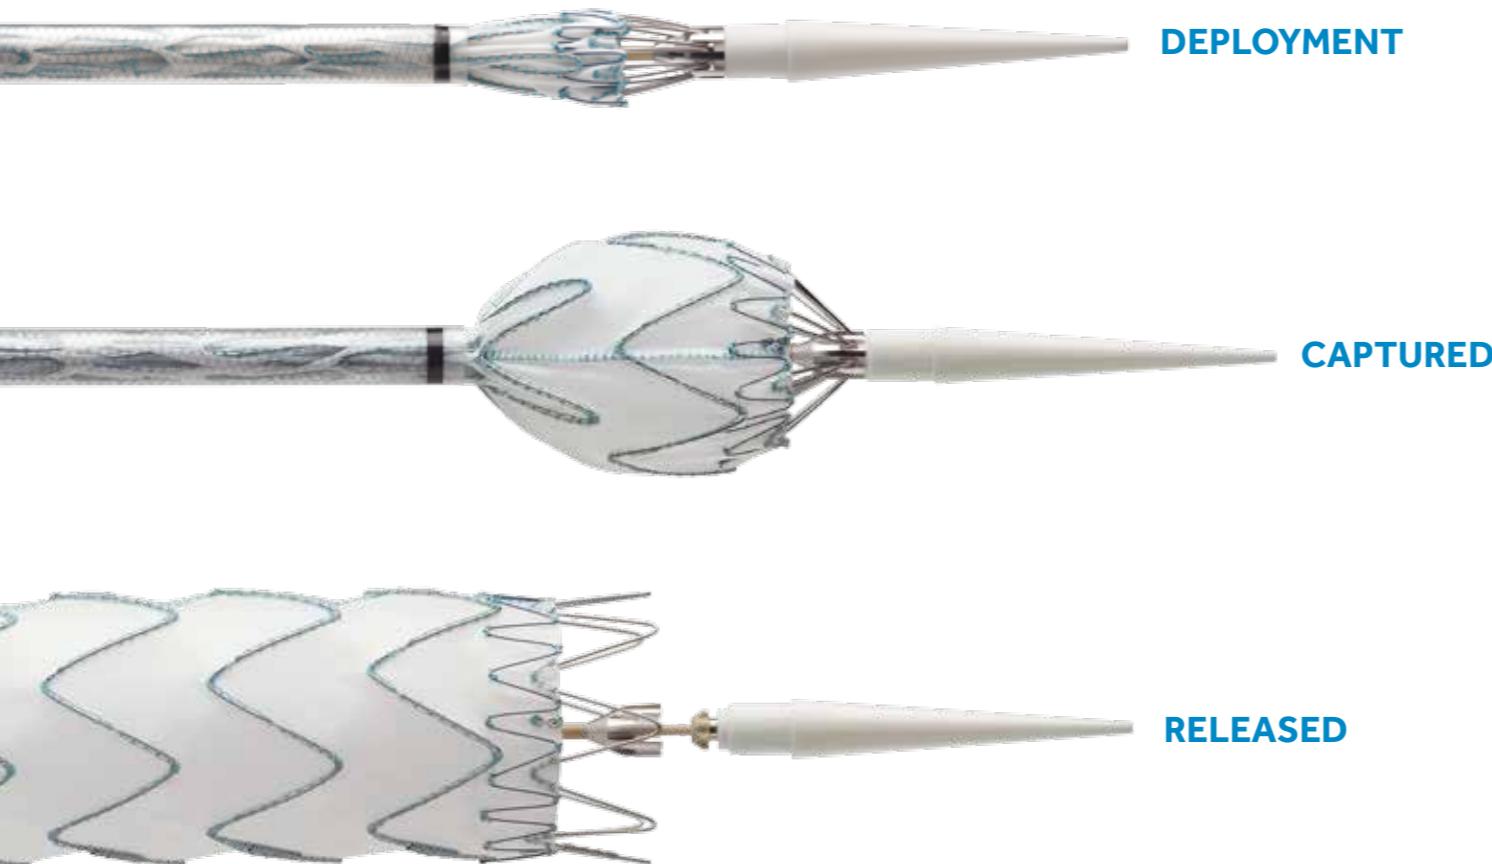

Tip capture for accuracy of positioning

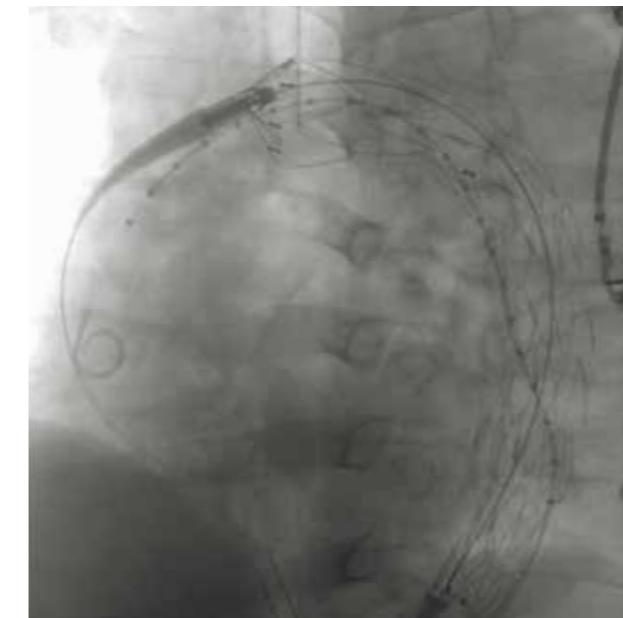

<sup>1</sup>Pantaleo A, Jafrancesco G, Buia F, et al. Distal Stent Graft-Induced New Entry: An Emerging Complication of Endovascular Treatment in Aortic Dissection. *Ann Thorac Surg.* 2016;102(2):527-532.

# PRECISE DEPLOYMENT

Controlled Deployment  
with Tip Capture

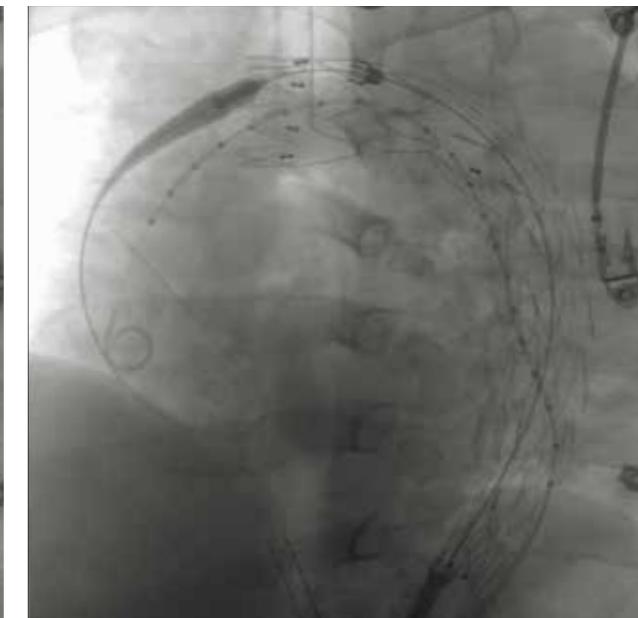

The Valiant™ Captivia™ system features tip capture of the proximal stent. Tip capture provides controlled deployment and placement when navigating the thoracic aorta.

**PLACEMENT**

Tip capture provides accurate stent graft placement

**RELEASE**

After tip capture is released, the Valiant™ Captivia™ system conforms to the patient's anatomy

# OPTIMAL SEAL

The Valiant™ Captivia™ system is designed to conform to the thoracic aorta. The sinusoidal shape and placement of nitinol springs provide flexibility and conformability to the anatomy. The Valiant™ stent graft is the only device that maintains complete apposition regardless of angulation and oversizing.<sup>2</sup>

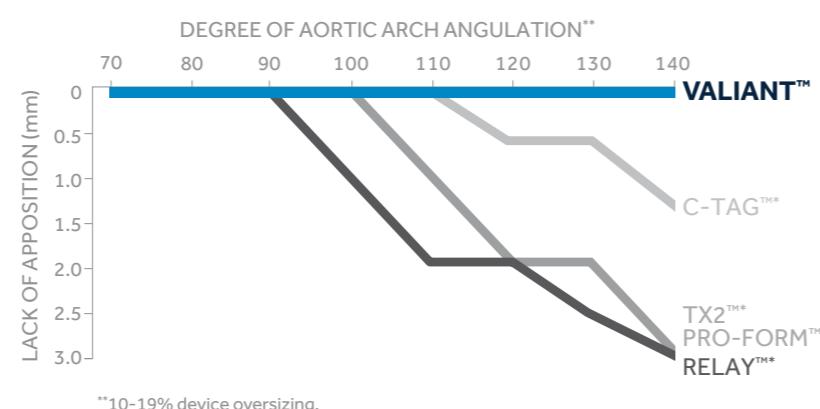

## RESULTS

The Valiant™ stent graft remained apposed to the aortic wall at each increment of neck angulation and degree of oversizing in a simulated environment.

For the other stent grafts tested, lack of device wall apposition was observed between the proximal anchorage segment and the inferior aortic wall.

### Angular Flexibility and Radial Strength Give the Valiant™ Captivia™ Stent Graft Conformability and Optimal Seal<sup>2</sup>

PRODUCT TESTED	Proximal Apposition at Different Landing Zone Angulation	Body Apposition at Different Landing Zone Angulation
Medtronic Valiant™	No lack of apposition (remained apposed)	No lack of apposition (remained apposed)
Gore™ C-TAG™	Lack of apposition above 120°	No lack of apposition (remained apposed)
Bolton Relay™	Lack of apposition above 110°	No lack of apposition (remained apposed)
Cook Zenith™ TX2™ Pro-Form™	No lack of apposition (remained apposed)	Lack of apposition above 110°

Test data not indicative of clinical performance.

# EASE OF ACCESS

The Valiant™ Captivia™ system features a crossing profile similar to or lower than other thoracic stent grafts for ease of access. Tip capture release means control across a broad range of pathologies.

## TIP CAPTURE RELEASE HANDLE

Simple turn-and-pull motion for tip release

## DEVICE OUTER DIAMETER PROFILES

Medtronic Valiant™	Bolton Relay™ Plus	Cook Zenith™ TX2™ Pro-Form™	Gore™ C-TAG™
Crossing Profile (OD) <sup>†</sup>	24 F	24 F	26 F
Hydrophilic Coating	Yes	Yes	No
Sheath Required	No	No	Yes

System OD for Gore C-TAG and Cook Zenith list the OD of sheath as their IFUs recommend the use of a sheath. The System OD for Medtronic Valiant and Bolton Relay list the OD of the delivery catheter as the use of a sheath is not required per the respective IFUs.

<sup>\*</sup>Third party brands are trademarks of their respective owners.

<sup>†</sup>36 mm diameter graft used for comparison for all manufacturers except Gore. A 37 mm diameter graft used for Gore since no 36 mm diameter graft exists.

## EASY THREE-STEP DEPLOYMENT PROCESS

### Step 1

Slow, controlled deployment for precise stent graft placement

### Step 2

Quick deployment option if desired

### Step 3

Tip capture release

## HYDROPHILIC COATING

to facilitate stent graft delivery

# PROVEN DESIGN

The Valiant™ Captivia™ system is built on 12 years of worldwide experience and is proven in more than 100,000 implants. Our advanced design enhances confidence.<sup>†</sup>

**Figur8 Markers for Accurate Placement.** Platinum-iridium markers provide high visibility.

**Proximal 8-peak FreeFlo Configuration.** Evenly distributes radial force over multiple apices.

**Broad Selection of Pieces.** Broad selection of proximal and distal components leads to many combinations to customize for a variety of patients.

**Enhanced Conformability.** Absence of longitudinal bar allows for enhanced flexibility and kink resistance.

# PROVEN CLINICAL TRACK RECORD

Proven performance across a variety of thoracic pathologies

## U.S. Medtronic Dissection Trial<sup>3</sup>

Prospective, nonrandomized, multicenter

Long-term Outcomes of TEVAR in Acute Type B Aortic Dissection:  
Results from the Valiant™ U.S. IDE Trial

## The Valiant™ Captivia™ System Successfully Treats

Broad Range of Pathologies and Anatomies

Comprehensive clinical studies and registries support the use of TEVAR with Valiant™ Captivia™ in patients with aortic dissections

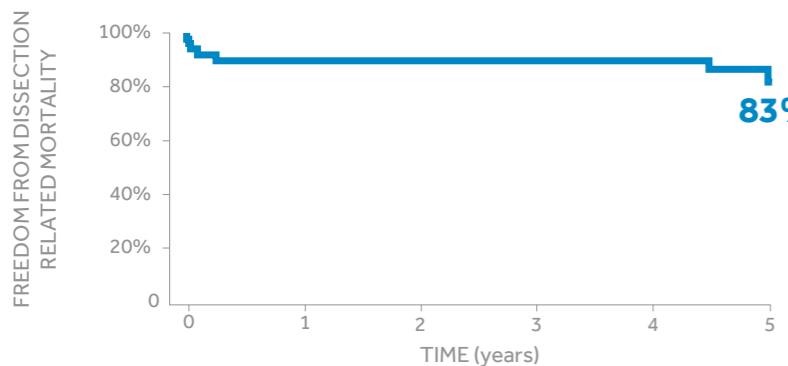

### FIVE-YEAR RESULTS

The Valiant™ Captivia™ system effectively treated acute complicated Type B aortic dissections with positive aortic remodeling through five years

### FIVE-YEAR EVIDENCE HIGHLIGHTS

- **94%** (16/17) true lumen diameter increase/stable
- **100%** (50/50) proximal entry tears fully excluded<sup>4</sup>
- **89%** (16/18) complete false lumen thrombosis
- **94%** (46/49) presented with DeBakey class IIIB dissections

### FREEDOM FROM DISSECTION-RELATED MORTALITY

"The majority of patients with acute Type B dissection will fail medical therapy over time... Patients who underwent any aortic intervention had a significant survival advantage over those who were treated with medical management alone."<sup>5</sup>

### MEDTRONIC CLINICAL DATA SUPPORTS THE USE OF TEVAR ACROSS MULTIPLE PATHOLOGIES

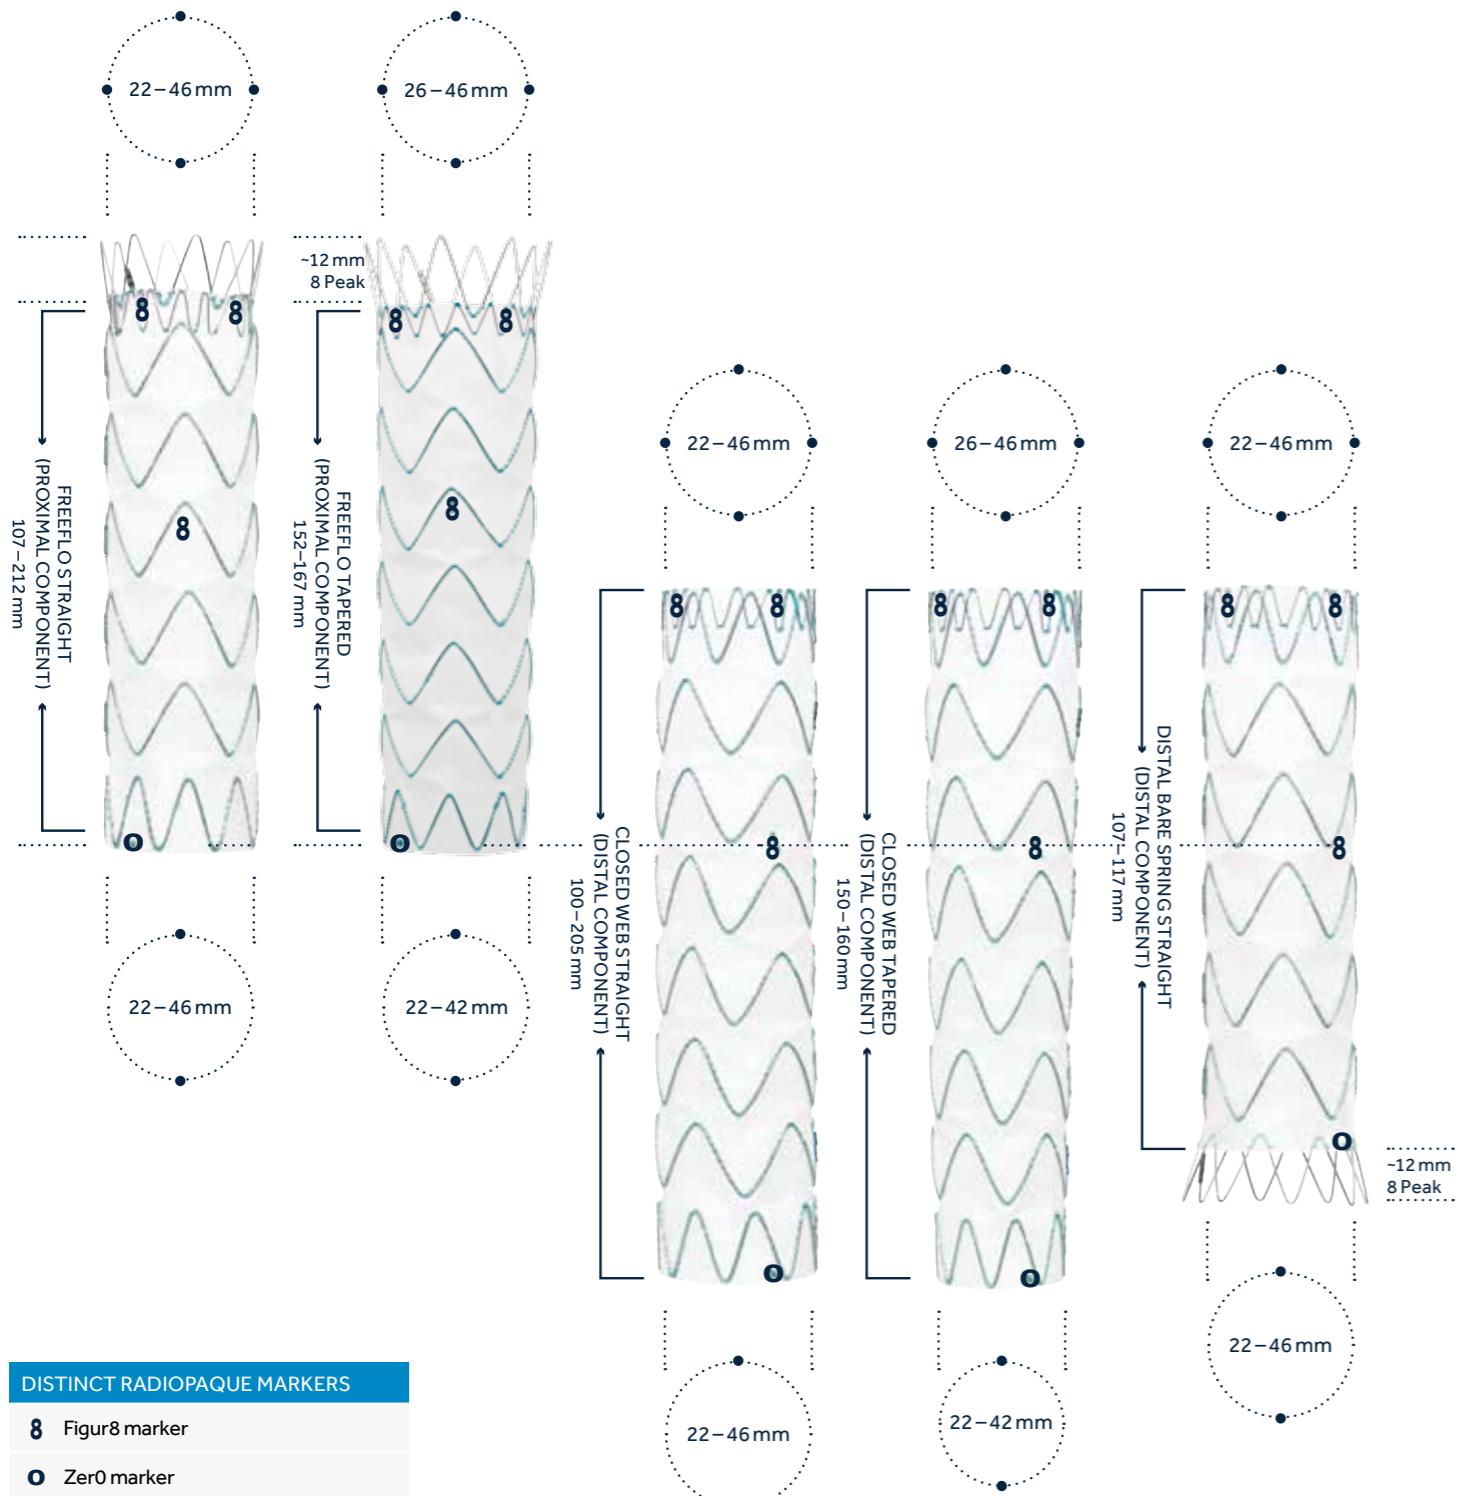

CLINICAL TRIAL/STUDY	# PATIENTS ENROLLED	TRIAL STUDY DESIGN
VALOR II (Valiant™ stent graft)	160	Prospective, nonrandomized, multicenter U.S. IDE study conducted to evaluate the safety and effectiveness of the Valiant™ stent graft system in patients with descending thoracic aneurysms
VIRTUE (Valiant™ stent graft)	100	Prospective, nonrandomized, multicenter European registry evaluating Valiant™ in Type B aortic dissections
VALIANT™ CAPTIVIA™ REGISTRY (Valiant™ Captivia™ system)	100	Multicenter, noninterventional, single arm registry, mid- to high-risk all comer cohort
RESCUE (Valiant™ Captivia™ system)	50	Prospective, nonrandomized, multicenter U.S. IDE trial to evaluate device performance in blunt thoracic aortic injury
Medtronic U.S. DISSECTION Trial (Valiant™ Captivia™ system)	50	Prospective, nonrandomized, multicenter U.S. IDE trial to evaluate device performance in acute, complicated Type B aortic dissections
