

# Master of Nursing Programme

## PROGRAMME DESCRIPTION

The Master of Nursing Programme is a clinically-based programme aiming to equip graduate nurses with the knowledge and competencies to incorporate theories and concepts of nursing science and the leadership and management skills into advanced nursing practice in a clinical specialty. The programme emphasises the development and utilisation of evidence-based knowledge, advanced clinical skills and management and leadership skills. It also prepares students to pursue nursing career advancement or postgraduate studies at a doctoral level.

## PROGRAMME STRUCTURE

The programme curriculum is specifically designed to prepare students for advanced nursing practice in a selected clinical specialty. In addition to courses covering a range of issues related to management and leadership, clinical reasoning and advanced nursing practice, students are also required to complete a supervised scholarly inquiry project on a research or service innovation topic in a selected area of clinical specialty.
