# Installation of uCentral App

1. Access the [uCentral](#) on campus or remotely through Easy Access if off-campus. Register for a personal account.

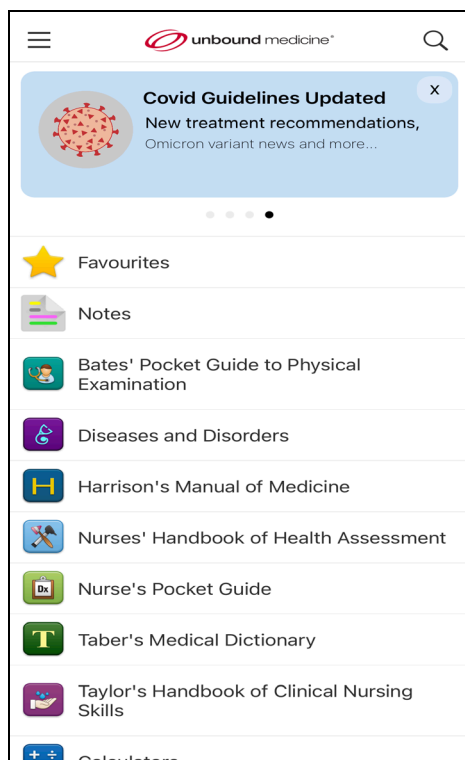

2. Download the uCentral app with mobile devices of [iOS](#) or [Android](#).

3. Open the app and login with the personal account created at uCentral.

4. uCentral starts to download the update content to the mobile device after authentication. It will take some time to download for the first time.

5. The e-books and tools are accessible after content update is completed.

6. You can remove or add the e-books and tools at the settings.

7. The app will automatically check for any content update when it is opened with your mobile device online.

8. You can install the uCentral app with one mobile phone and one tablet. You will be asked to switch your account to the new the device when you attempt to install it on a third device.
