# The Hong Kong Healthy Schools Award Scheme

## Tin Shui Wai Catholic Primary School

The Hong Kong Healthy Schools Award Scheme

“Healthy Schools Nurture Smart Kids”---- We are pleased to have the honour to be awarded the Bronze Award in “The Hong Kong Healthy School Award Scheme 2004”. The most grateful and encouraging achievement is the enhancement of the holistic health education in our school through the Scheme. We have been making self-improvement and moving towards “A State of Perfection”.

The main educational objective of our school is to build “A School of Christianity”. Since 1995, we have been putting forward all our effort to promote school-based health policies and

curriculum. We have also been putting emphasis on physical, mental as well as spiritual development of our kids. We have a firm belief that life can affect and enrich life under the sunshine of God. With this belief we have been trying our very best to reach our goal of creating a healthy school and nurturing smart and happy kids. After joining “The Hong Kong Healthy Schools Award Scheme” (2001-2004), the health culture has been developing steadily and successfully in our school. It really helps the promotion of “All-round Development of our Children” and nurtures “A School of Love and Care”.
