

1st German Movie Night @ CUHK 2019

Who am I – No System is safe!

An action film about hackers and online security

The German film *Who Am I* deals with the topics of identity and security on the Internet. Even at the beginning it's clear that this movie isn't about harmless nude pictures, that it wants to offer more than darkened rooms, endless columns of numbers and pale faces. The strength of the film is the story. *Who Am I* is exciting and thrilling—it shows how easy it's to hack our laptops and smartphones. And how easy it is to pretend to be somebody you are not. Think about it.
