Invitation: "Course on Biosafety Management and Biosafety Level 3 Practices"

18th October 2007

Dear Colleagues,

I am glad to inform you that our department, in collaboration with the Asia-Pacific Biosafety Association, is going to organize a course on Biosafety Management and Biosafety Level 3 Practices on 3-5 December 2007. This course aims at providing a comprehensive knowledge and know-how on Biosafety essential for administrators, managers as well as researchers and technicians working with infectious organisms of different risk groups, both in research and clinical service laboratories. Furthermore, this course will also cover laboratory design and maintenance. All the teaching faculty members are well-qualified and experienced Biosafety-in-charge persons, who are involved in running a regular Biosafety Management Course accredited by the Singapore Ministry of Health. It is our great pleasure and rare opportunity that the Asia-Pacific Biosafety Association has kindly agreed to delivery this course in Hong Kong and with some modifications to fit our local needs. More importantly we are able to charge at a much lower rate than it used to be.

You and your colleagues are cordially invited to attend this course. Since seats are limited, the enrollment will be in a first-come, first-served basis. The registration deadline is 20th November 2007.

We look forward to see you in the course.

Yours truly,

Professor Paul KS Chan
