## 2. Hong Kong - Tainan Cultural & Creativity Exchange Programme 香港 - 台南文化創意探索之旅

The HK - Tainan Cultural & Creativity Exchange Programme co-organized by the Creativity Lab (c!ab) of our College and Institute of Creative Industries Design (iCiD) of Taiwan National Cheng Kung University (NCKU) at Tainan was successfully held last week from 4<sup>th</sup> to 8<sup>th</sup> Jan.

The Programme was commenced with our participation in The International Conference of Culture and Creativity (ICCC) 2015. 18 Sunnies attended the Conference on 5<sup>th</sup> Jan and learnt how creativity and innovation city planning and design can help rejuvenate historical cities with commercialization of cultural content.

The Programme leaders from our College, Professor C.Y. Chiu (趙志裕教授), College Fellow and Dean, Faculty of Social Science; Professor Annisa C.H. Lee (李賴俊卿教授), Dean of Students, and Professor Letty Y.Y. Kwan (關欣儀教授), College Member have been invited to be guest speakers of the workshops and forums to illustrate the concept and model of Design Thinking and their research results.

A site visit to Five-harbour District (五條港) was led by local students in the afternoon. The visit has provided opportunities to all participants to explore unique characteristics of Tainan and the cultural innovation and preservation work done by the local government.

Workshops were held in the evening and students from WYS college and Master Programme of iCiD have worked together and try to investigate the similarities and differences between Hong Kong and Tainan. Novel ideas were exchanged and series of solutions were

proposed.

The programme climaxed with the Forums and presentation held in the third day. With an overnight hard work by the participants, the Forums and presentation was a great success. Students got the chance to present their previous studies in Sai Kung to students and professors of NCKU, as well as the professionals in Cultural Industries in Tainan, and valuable feedback were received from them.

A fabulous music show was organized by the students of iCiD which let all participants get relaxed after working programmes. At last, a visiting tour to cultural museums and parks has brought the Programme to the finale.

### 3. Yan Chak Service-Learning Programme — Service-Learning Trip to Yunnan 仁澤服務學習計劃 — 雲南服務學習之旅

The eight days in Yunnan have been fruitful for the 16 Sunnies participating in the Service-Learning supported by Hong Kong Shun Lung Yan Chak Foundation Limited. Although the weather was freezing, the team, led by Mr. Wai-hung Tang (鄧惠雄先生), Director of Service-Learning Program (服務學習計劃主任), still sparkled and shared warmth with the local community. Learning about the issues of floating population in the community center of Yunnan Linxin (雲南連心), our Sunnies enhanced community integration by wall-painting while some experienced the daily work of the floating population women in “Design for Life” (綠工坊). The participants also brought a warm and joyful new year eve to a group of elderly in a remote and rural village. In spite of the heavy rain affecting the organization of the fun fair for local kids, the participating students demonstrated their flexibility and creativity amid the sudden change of plan. What amazed the group most were the diverse cultures of the 26 ethnic minority groups in Yunnan and their integration triggering personal reflections.

### 4. Yan Chak Service-Learning Programme - Service Learning Trip to Cambodia X Project Little Dream 柬埔寨服務學習之旅 X 夢·行動

Our Sunnies joined hands with Project Little Dream (夢·行動), PLD, in the Service-learning Trip to Cambodia (柬埔寨服務學習之旅) to work on a pioneering healthcare project in Takéo Province, Cambodia. The group of nine students departed on 29<sup>th</sup> Dec for a seven-day trip, and visited a local organic farmer to construct an ecological toilet as a pioneering programme. The group also visited the PLD school premises and learnt about the education system in Cambodia.

The group of nine investigated the hygiene conditions in Cambodia, and learnt that sanitation in Cambodia rural areas has always been a concern. One of the problems was the disposal of mixed solid and liquid excreta, which causes great hygiene problem and pollution to soil and water resources.

Students joined the construction team and built the eco-toilet, which may set an example to local households for improving sanitations and hygiene. The eco-toilet would allow the separation of solid and liquid wastes, and eliminate the growth of disease-causing micro-organism. Urine could be allowed more time for decomposition by plantation in the artificial wet land to reduce pollution to the soil, while feces collected could be used as fertilizers to allow greener farming. With the pioneering project, it is hoped that this could initiate more concerns on sanitation and hygiene in Cambodia, so that locals could enjoy a more healthy life.

Stepping into the local communities allowed the Sunnies to experience Cambodian life, and most importantly, learn how to start a community project with their expertise while understanding the needs of the target.
