

THE CHINESE UNIVERSITY OF HONG KONG SCHOOL OF LIFE SCIENCES

Seminar

Diving with Jiao Long (蛟龍號) to the Depth of South China Sea

With

Dr. Qiu Jian Wen

Associate Professor
Baptist University of Hong Kong

Sept 26, 2013 (Thu)

12:30 to 1:30 PM

Rm 297, Science Centre

In this seminar Dr. Qiu will share his experience in the Jiaolong's first applied scientific expedition earlier this summer in South China Sea. The Jiaolong, a Chinese manned submersible, was built to dive to 7,000 m - the deepest among the same class of submersibles. The ecosystems visited during the expedition included an extinct volcano with manganese nodules on the sea bed and an active cold seep with mussels and squat lobsters carpeting calcium carbonate rocks.

ALL ARE WELCOME !
