Presentation of Dean's List
頒發院長榮譽獎狀

Presentation of Scholarships & Awards
頒發獎學金及獎項

Tea Reception at University Mall
茶會（百萬大道）

MESSAGE FROM THE DEAN

院長序言

The annual Teachers' and Students' Awards Presentation Ceremony is a significant event on the calendar of events in the Faculty of Medicine. This is the one occasion when we get together to openly recognize our inspiring teachers whose passion and dedication to teaching and learning deserve our deep respect. Apart from playing vital roles in providing excellent education, they have students' affairs and well-being at heart. They are role models for students and peers. In honouring them at this occasion, we are paying tribute to all teachers who have contributed to the success of this Faculty in nurturing generations of devoted graduates to serve our society.

This joyful event also presents us an opportunity to celebrate the academic accomplishments of our brilliant students. The Faculty of Medicine selects only the best students. Joining our ranks is an achievement through years of hard work of which your parents have played a very important supporting role. Please join me in congratulating and thanking your parents who are proud of you. Studying a professional programme at CUHK is only the beginning of a life-long career in the medical and healthcare field. Winston Churchill said, "Success is not final, failure is not fatal: it is the courage to continue that counts." I am hopeful that all students in the Faculty of Medicine not only learn by heart but also practise this pithy advice to achieve and to sustain success in their career and personal life.

Finally, I would like to take this opportunity to express my gratitude to our benefactors and donors. Your generosity is a great encouragement to our students. We deeply appreciate your unfailing and continuous support in our pursuit for excellence.

A handwritten signature in black ink, appearing to be 'Francis K.L. Chan'.

Professor Francis K.L. CHAN

SHARING BY STUDENT AWARDEES

得獎學生分享

Miss WONG Wai Hung (Gerontology)

In University, we are provided with ample opportunities to explore ourselves and to search for our goals. 'Attitude determines altitude.' Being an active learner, I know more about myself beyond limitations. Now I see the world in a wider perspective and my future is getting more clearly found.

I would like to thank for the generosity of the donor. I would make good use of the award to develop myself into a better person and to reward the community upon graduation. I would also like to express my gratitude to the teachers who provide me with countless learning opportunities. I have learnt a lot from them and acquired the ability to apply interdisciplinary collaborative care model in planning and coordinating elderly care services. I am so grateful to having a fruitful and inspiring college life.

Receiving the award encourages me to venture more of my time for the pursuit of knowledge. I would acquire more knowledge in promoting the wellness of older people and be more creative in solving their problems. In the last semester, I will continue to equip myself with knowledge and skills in gerontology and work towards my career goals.

Miss FUNG Ka Po, Anita (Pharmacy)

It is my pleasure and privilege to extend a very hearty vote of thanks to the Faculty of Medicine! Firstly, I would like to thank all teaching staff from School of Pharmacy and School of Biomedical Sciences for providing us with many insightful lectures and learning activities.

Apparently, our curriculum is a dynamic training program, which has a good integration between knowledge and practice based. It does not simply teach us knowledge and skills but also emphasizes more on problem solving, creative thinking and lifelong learning. Teachers from School of Pharmacy have put much contribution to create innovative environment by offering various clerkship sites and outreach projects. We really appreciate all these learning experiences as we can explore diversity of being a pharmacist in hospital, community and industrial settings, in pursuit of reaching our ultimate goal to provide pharmaceutical care. In particular, we can develop our communication skills with patients and other health professionals through the learning process.

Last but not least, I would like to express my earnest gratitude and appreciation to all the teaching and non-teaching staff from the Faculty for their meticulousness in paving a challenging but rewarding journey for us to become a healthcare professional in future.
