

Master of Philosophy - Doctor of Philosophy in Nursing Programme

PROGRAMME DESCRIPTION

The programme aims to facilitate the development of postgraduate nurses with a high level of scholarship and research expertise in nursing practice.

PROGRAMME STRUCTURE

The programme is research-focused, and students learn primarily through conducting original research supervised by academic members of the School. The programme offers two study streams – the MPhil stream and the PhD stream. Students should indicate which stream they intend to pursue at the time of application.

For both study streams, students are required to complete 12 units of lecture courses, thesis research courses, and attend weekly research seminars. They will be admitted to either the MPhil stream as an MPhil student or the PhD stream as a PhD (pre-candidacy) student. The two streams are articulated, which means that students can, with Division Head's approval, transfer from MPhil to PhD (pre-candidacy), and vice-versa.
