

## CUHK Innovation Day 2022

## Tentative Programme Rundown

Opening Session	
09:30 - 10:00	Registration
10:00 - 10:10	Opening Speech
	Prof. Rocky TUAN, Vice-Chancellor and President, CUHK
10:10 - 10:30	Kick-off Ceremony
	Officiating Guests
	• Prof. Dong SUN, JP, Secretary for Innovation, Technology and Industry, HKSAR
	Prof. John CHAI, Chairman, The Council, CUHK
	<ul> <li>Prof. Rocky TUAN, Vice-Chancellor and President, CUHK</li> </ul>
	Prof. Alan CHAN, Provost, CUHK
	• Prof. Mai Har SHAM, Pro-Vice-Chancellor (Research) and Vice-President, CUHK
	• Prof. Benny ZEE, Director, Office of Research and Knowledge Transfer Services,
	СИНК
Thematic Sessio	on 1: Vaccinology
10:30 - 10:50	Design of Lipid Nanoparticles for mRNA Vaccine
	Dr. Linxian LI, Ming Wai Lau Centre for Reparative Medicine, Karolinska Institutet
10:50 - 11:10	Predicting Vaccine Effectiveness Against New Genetic Variants and Reverse
	Vaccinology
	Prof. Maggie Haitian WANG, The Jockey Club School of Public Health, Faculty of
	Medicine, CUHK
11:10 - 11:30	Computational and Structural Biology Approaches to Address Challenges of an
	Effective Vaccine
	Prof. Peter Pak Hang CHEUNG, Department of Chemical Pathology, Faculty of
	Medicine, CUHK
11:30 - 11:45	Break
11:45 - 12:30	Panel Discussion on Vaccinology
	Moderator:
	Prof. Benny ZEE, Director, Office of Research and Knowledge Transfer Services
	Panelists (listed in alphabetical order):
	Prof. Renee Wan Yi CHAN, Department of Paediatrics, Faculty of Medicine, CUHK
	Prof. Zigui CHEN, Department of Microbiology, Faculty of Medicine, CUHK
	Prof. Peter Pak Hang CHEUNG, Department of Chemical Pathology, Faculty of
	Medicine, CUHK
	Prof. Chris Ka Pun MOK, The Jockey Club School of Public Health and Primary     Orma Faculty of Marking 2011
	Care, Faculty of Medicine, CUHK
	• Prof. Hein Min TUN, The Jockey Club School of Public Health and Primary Care,
	Faculty of Medicine, CUHK
	• Prof. Maggie Haitian WANG, The Jockey Club School of Public Health and Primary Care, Faculty of Medicine, CUHK
	Finnary Care, Faculty of Medicine, CORK
12:30 - 13:30	Innovation Day Elevator Pitch Competition
13:30 - 14:00	Break
10.00 14.00	bioun

Afternoon Session	
14:00 - 14:15	Welcome Remarks and Award Presentation
	Prof. Mai Har SHAM, Pro-Vice-Chancellor (Research) and Vice-President, CUHK
Thematic Session 2: Microelectronics	
14:15 - 14:35	Electronic Design Automation (EDA)
	Prof. Martin D. F. WONG, Dean, Faculty of Engineering, CUHK
14:35 - 14:55	Silicon Photonics: Advances in Communications, Sensing and Computing
	beyond Moore's Law with the use of Photons in Silicon Chips
	Prof. Hon Ki TSANG, Department of Electronic Engineering, Faculty of Engineering,
	СИНК
14:55 – 15:15	New Generation Medical Devices Enabled by Hybrid and Nanostructured
	Semiconductors
	Prof. Ni ZHAO, Department of Electronic Engineering, Faculty of Engineering,
	СИНК
15:15 - 15:25	Break
Thematic Sessie	on 3: Carbon Neutrality
	on 3: Carbon Neutrality Safe and Low Cost Aqueous Energy Storage Technologies and Their
Thematic Sessie	on 3: Carbon Neutrality Safe and Low Cost Aqueous Energy Storage Technologies and Their Applications
Thematic Sessie	on 3: Carbon Neutrality Safe and Low Cost Aqueous Energy Storage Technologies and Their Applications Prof. Yi-Chun LU, Department of Mechanical and Automation Engineering, Faculty
Thematic Session 15:25 - 15:45	on 3: Carbon Neutrality Safe and Low Cost Aqueous Energy Storage Technologies and Their Applications Prof. Yi-Chun LU, Department of Mechanical and Automation Engineering, Faculty of Engineering, CUHK
Thematic Sessie	on 3: Carbon Neutrality Safe and Low Cost Aqueous Energy Storage Technologies and Their Applications Prof. Yi-Chun LU, Department of Mechanical and Automation Engineering, Faculty of Engineering, CUHK Learn to Fabricate High-performance Third-Generation Solar Cells with Grazing
Thematic Session 15:25 - 15:45	on 3: Carbon Neutrality Safe and Low Cost Aqueous Energy Storage Technologies and Their Applications Prof. Yi-Chun LU, Department of Mechanical and Automation Engineering, Faculty of Engineering, CUHK Learn to Fabricate High-performance Third-Generation Solar Cells with Grazing Incidence Scattering Techniques
Thematic Sessio 15:25 - 15:45 15:45 - 16:05	on 3: Carbon Neutrality         Safe and Low Cost Aqueous Energy Storage Technologies and Their         Applications         Prof. Yi-Chun LU, Department of Mechanical and Automation Engineering, Faculty of Engineering, CUHK         Learn to Fabricate High-performance Third-Generation Solar Cells with Grazing Incidence Scattering Techniques         Prof. Xinhui LU, Department of Physics, Faculty of Science, CUHK
Thematic Session 15:25 - 15:45	on 3: Carbon Neutrality         Safe and Low Cost Aqueous Energy Storage Technologies and Their         Applications         Prof. Yi-Chun LU, Department of Mechanical and Automation Engineering, Faculty of Engineering, CUHK         Learn to Fabricate High-performance Third-Generation Solar Cells with Grazing Incidence Scattering Techniques         Prof. Xinhui LU, Department of Physics, Faculty of Science, CUHK         Pathways Towards Carbon Neutral Chemical Industries
Thematic Session 15:25 - 15:45 15:45 - 16:05 16:05 - 16:25	on 3: Carbon Neutrality         Safe and Low Cost Aqueous Energy Storage Technologies and Their         Applications         Prof. Yi-Chun LU, Department of Mechanical and Automation Engineering, Faculty of Engineering, CUHK         Learn to Fabricate High-performance Third-Generation Solar Cells with Grazing Incidence Scattering Techniques         Prof. Xinhui LU, Department of Physics, Faculty of Science, CUHK         Pathways Towards Carbon Neutral Chemical Industries         Prof. Ying WANG, Department of Chemistry, Faculty of Science, CUHK
Thematic Sessio 15:25 - 15:45 15:45 - 16:05	on 3: Carbon Neutrality         Safe and Low Cost Aqueous Energy Storage Technologies and Their         Applications         Prof. Yi-Chun LU, Department of Mechanical and Automation Engineering, Faculty of Engineering, CUHK         Learn to Fabricate High-performance Third-Generation Solar Cells with Grazing Incidence Scattering Techniques         Prof. Xinhui LU, Department of Physics, Faculty of Science, CUHK         Pathways Towards Carbon Neutral Chemical Industries         Prof. Ying WANG, Department of Chemistry, Faculty of Science, CUHK         Closing Remarks
Thematic Session 15:25 - 15:45 15:45 - 16:05 16:05 - 16:25	on 3: Carbon Neutrality         Safe and Low Cost Aqueous Energy Storage Technologies and Their         Applications         Prof. Yi-Chun LU, Department of Mechanical and Automation Engineering, Faculty of Engineering, CUHK         Learn to Fabricate High-performance Third-Generation Solar Cells with Grazing Incidence Scattering Techniques         Prof. Xinhui LU, Department of Physics, Faculty of Science, CUHK         Pathways Towards Carbon Neutral Chemical Industries         Prof. Ying WANG, Department of Chemistry, Faculty of Science, CUHK
