The grass is greener on the other side...

Be inspired!

Stories and more stories...

Be informed!

The devil is in the details...

Be challenged!

Words of Wisdom

The **BEST** universities focus on EDUCATION!

The **BETTER** universities focus on citation numbers and impact factors...

The **GOOD** universities focus on counting the number of publications...

Our Education System

Everybody is a genius. But if you judge a fish by its ability to climb a tree, it will live its whole life believing that it is stupid.

MILESTONES IN E-LEARNING

1971

The Open University opens in England with an open admissions policy, and begins broadcasting lectures on television. **25,000 students enroll.**

1989

University of Phoenix launches its private, for-profit online school **12 students enroll.**

1993

Criteria is created by pioneer William Graziadei III, Ph.D: e-learning systems must be easy to use, portable, replicable, scalable, and affordable.

1999

The term **'e-Learning' is coined** at an educational seminar.

2004

Salman Khan records instructional YouTube videos to help his cousins with math. **The rising popularity of these videos leads him to found the Khan Academy,** a not-for-profit, free, online educational organization.

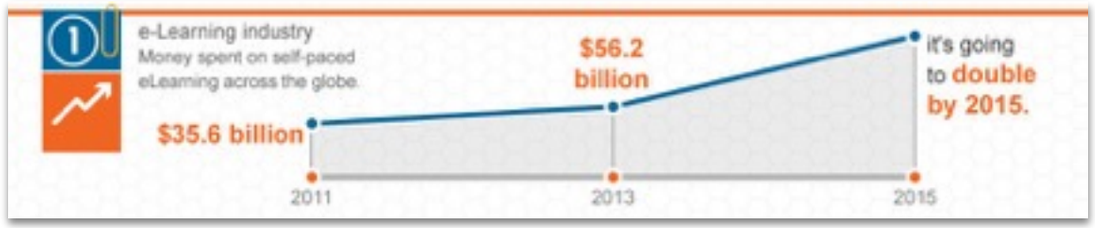
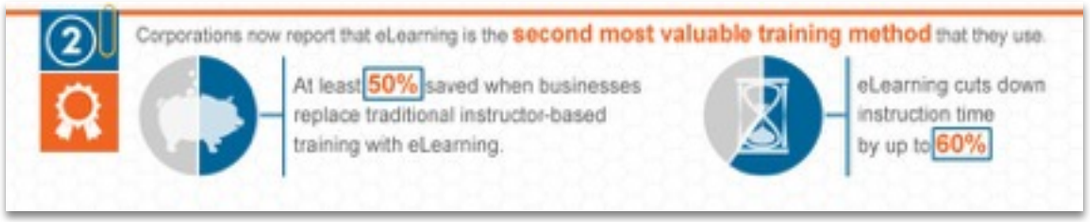
STATISTICS FOR 2014
Keep-Up-To-Date
system
content
support
social
internet
computer
Productivity
Opportunities
work
The rise in eLearning's popularity isn't showing any signs of slowing. In fact, judging by the following Top 10 eLearning statistics for 2014, the future of the eLearning Industry is brighter than ever:



1
e-Learning industry
Money spent on self-paced eLearning across the globe.
$35.6 billion
$56.2 billion
it's going to double by 2015.
2011
2013
2015



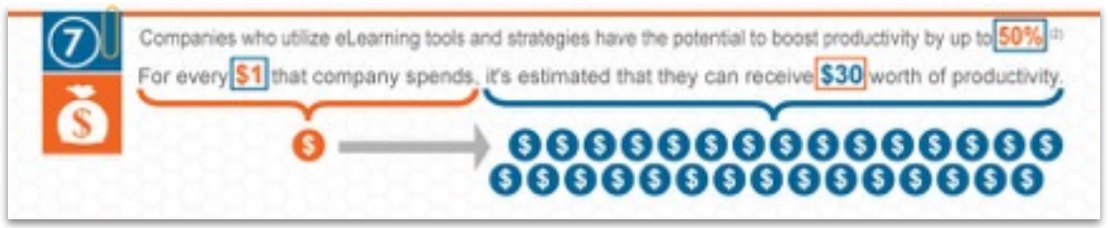
2
Corporations now report that eLearning is the second most valuable training method that they use.
At least 50% saved when businesses replace traditional instructor-based training with eLearning.
eLearning cuts down instruction time by up to 60%

3
2013: About 4.6 out of ten college students* are taking at least one course online.
2019: Roughly half of all college classes* will be eLearning-based.

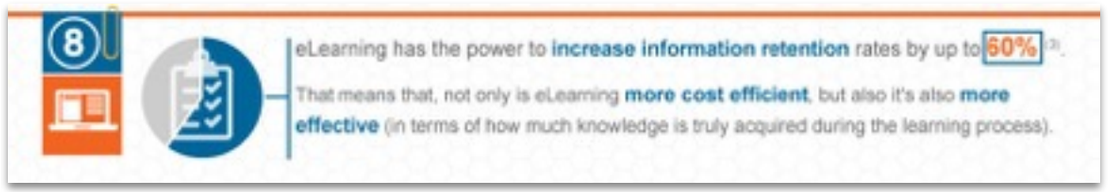
4
eLearning is Eco-Friendly [1]
ENERGY
Consumes 90% less energy than traditional education courses.
The amount of CO2 emissions (per student) is also reduced by up to 85%.
EMISSIONS
CO2

5
Over 41.7% of global Fortune 500 companies now use some form of technology to instruct employees during formal learning hours, and this is going to steadily increase in future years.
USAGE

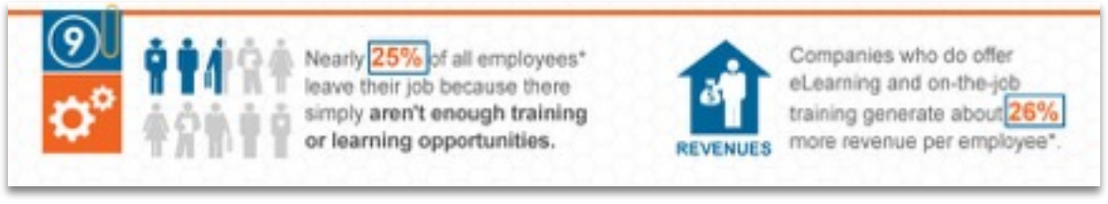
6
Self-paced eLearning's estimated 5 year annual growth rate*
Western Europe: 5.8%
Revenues by 2015:
$8.1 billion
The world's most rapidly growing eLearning markets are:
Malaysia and Vietnam.
Asia: 17.3%
Middle East: 8.2%
Revenues by 2016:
$560.7 million
Africa: 15.4%
Revenues by 2016:
$512.8 million



7
Companies who utilize eLearning tools and strategies have the potential to boost productivity by up to 50% [2]
For every $1 that company spends, it's estimated that they can receive $30 worth of productivity.



8
eLearning has the power to increase information retention rates by up to 60% [3].
That means that, not only is eLearning more cost efficient, but also it's also more effective (in terms of how much knowledge is truly acquired during the learning process).



9
Nearly 25% of all employees* leave their job because there simply aren't enough training or learning opportunities.
REVENUES
Companies who do offer eLearning and on-the-job training generate about 26% more revenue per employee*.

10
72% of companies who were included in a recent survey stated that eLearning helps them to keep up-to-date with changes in their industry, which helps them to remain competitive within their niche.[4]
Companies and organizations that did have a strong learning culture did better in their market than those who do not. For example:
These organizations are 46% more like to be the leader in their industry
34% increase in their ability to respond to the needs of the customer
17% more likely to become the market share leader.

KEEP

What is KEEP?

- KEEP is a **multi-year** and **cross-institutional** project with strong partners and alliances
- KEEP is the **big data learning analytics** cloud platform
- KEEP serves as a creative **online learning gateway** for educators and learners around the world
- KEEP encourages and promotes **flexible and active learning**
- KEEP is a **knowledge aggregator** and a **technology integrator**

Our Vision

To **empower people** by providing and promoting the **best education resources** in order to facilitate collaboration and innovation for **teaching and learning** through **knowledge aggregation** and **technology integration**

Our Mission

- Organize and search accessible and useful materials
- Gain fresh insights through analytics
- Collect the best online courses
- Promote innovative education applications

ACML 2015

7th Asian Conference on Machine Learning
November 20-22, 2015, Hong Kong

Organizers

Seventh Asian Conference on Machine Learning, Hong Kong

The Chinese University of Hong Kong and Hong Kong Science Park
November 20-22, 2015

ANNOUNCEMENTS

- We are calling for paper submissions, workshop proposals, and tutorial proposals.

ACML 2015

The 7th Asian Conference on Machine Learning (ACML2015) will be held in Hong Kong on November 20-22, 2015. The conference aims to provide a leading international forum for researchers in machine learning and related fields to share their new ideas, progresses and achievements. Submissions from regions other than the Asia-Pacific are also highly encouraged.

The conference calls for high-quality, original research papers in the theory and practice of machine learning. The conference also solicits proposals focusing on frontier research, new ideas and paradigms in machine learning. The conference proceedings will be published in The Journal of Machine Learning Research (JMLR): Workshop and Conference Proceedings series.

See the Call for Papers for details and submit through the paper submission site.

IMPORTANT DATES

BigScholar 2015

Welcome to
BigScholar 2015

The Second WWW Workshop on
Big Scholarly Data: Towards the Web of Scholars
http://msclab.org/bigscholar/

A workshop of WWW 2015 (The 24th International World Wide Web Conference)
Florence, Italy, May 19, 2015

The BigScholar 2015 workshop aims at bringing together researchers and practitioners working on Big Scholarly Data to discuss what are emerging research issues and how to explore the Web of Scholars. Several core challenges, such as the tools and methods for analyzing and mining scholarly data will be the main center of discussions at the workshop. The goal is to contribute to the birth of a community having a shared interest around the Web of Scholars and exploring it using data mining, recommender systems, social network analysis and other appropriate technologies.

The workshop will be a half-day workshop. The format of the workshop will include one invited talk (keynote), research and position paper presentations and one discussion panel. The workshop will be held in the afternoon on May 19, 2015 in Florence, Italy, in conjunction with the 24th International World Wide Web Conference (WWW 2015).

Important Dates

Paper submissions due:
Jan 24, 2015
Notification of acceptance:
Feb 22, 2015
Camera ready version due:
Mar 8, 2015
Workshop date:
May 19, 2015

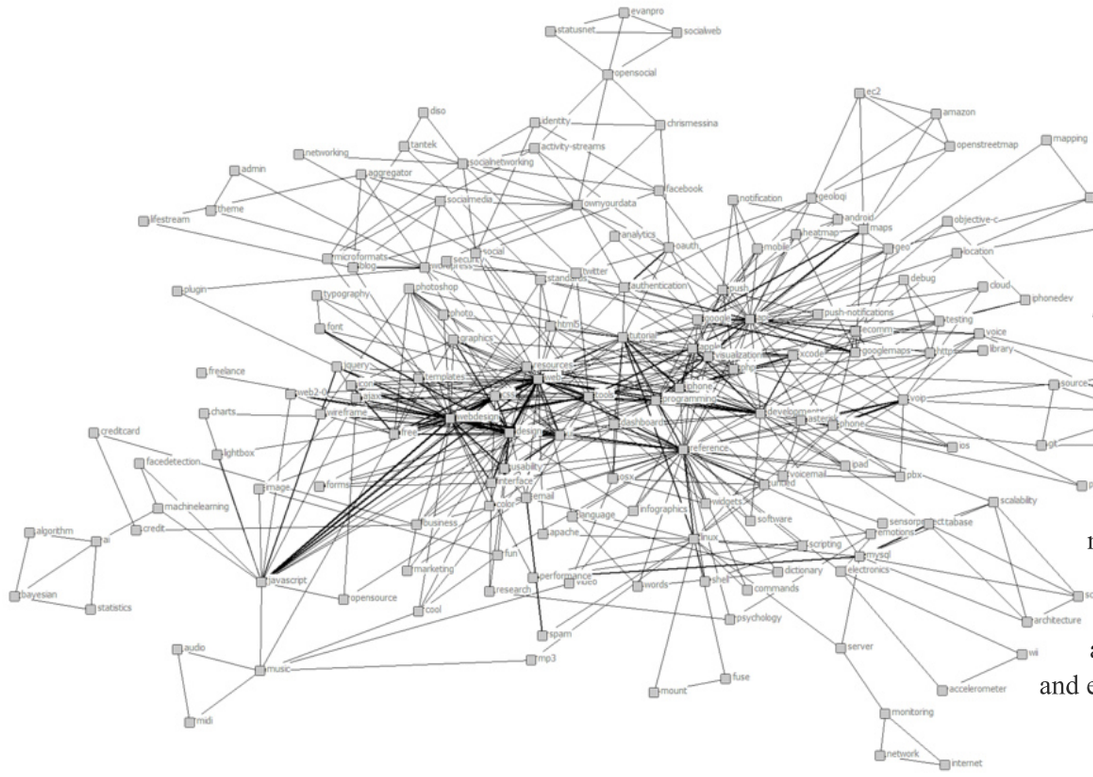
WWW2015 Workshop on Web-based Education Technologies (WebET 2015) May 19, 2015, Florence, Italy

New Book Series

SOCIAL MEDIA & SOCIAL COMPUTING

CALL FOR BOOKS!



The Social Media and Social Computing Series focuses on publishing high quality references in the rapidly emerging area of social media and social computing. Both experimental/practical as well as theoretical investigations are welcome. The series targets both scholars and practitioners in social media and social computing for work in the intersection of computer science, information technology, psychology, economics, education and other social sciences.

The advent of the Internet and the Web has resulted in social interactions and behaviors through the use of technologies and web services, e.g., hardware devices such as smart phones, tablets, RFID, etc., software services such as wikis, blogs, micro-blogs, social network sites, recommender systems, social bookmarking, social news, multimedia sharing sites, etc. Analyzing these technologically-enabled interactions in their social context will benefit information providers and information consumers. However, the large volume and scale of user-generated contents require effective modeling methods and efficient algorithms to handle these chalenging problems.

Series Editor:

Irwin King

Prof. King is Associate Editor of the IEEE Transactions on Neural Networks (TNN) and IEEE Computational Intelligence Magazine (CIM). He is a senior member of IEEE and a member of ACM, International Neural Network Society (INNS), and VP & Governing Board Member of the Asian Pacific Neural Network Assembly (APNNA) . He serves the Neural Network Technical Committee (NNTC) and the Data Mining Technical Committee under the IEEE Computational Intelligence Society.
